Boske, 1999 This report the second in a two year series provides an in depth look at selected multimodal intermodal transportation planning methods funding programs and projects The report is intended to provide a detailed appraisal of a spectrum of multimodal intermodal practices from which policymakers in Texas could select those types of practices deemed most advantageous and appropriate to the state In contains seven case studies of Best Practices in Multimodal Intermodal Planning Methods six case studies of Selected Multimodal Intermodal Funding Programs and five case studies of Selected Multimodal Intermodal Projects Several Appendices at the end of the report contain relevant information on authorizing legislation program application forms funding eligibility criteria cooperative agreements and the like Measures of Effectiveness for Major Investment Studies Shawn Turner, Matthew E. Best, David L. Schrank, 1996 This report examines measures of effectiveness that can be used to compare the benefits and impacts of transportation improvements for a major investment study A literature review was used to gather information about transportation performance measures and the social economic and environmental effects of transportation All metropolitan planning organizations within the state of Texas were surveyed to determine the state of the practice for major investment studies within the state A list of candidate measures of effectiveness for major investment studies was developed and various judging criteria were used to qualitatively evaluate the measures Preferred measures of effectiveness were identified that quantify the following benefits or impacts of transportation improvements transportation performance financial economic performance social impacts land use economic development impacts and environmental impacts Preferred transportation performance measures consisted mainly of person movement and travel time based measures Financial economic

performance measures centered around the cost effectiveness benefit to cost ratio and the financial feasibility and considered the full costs including externalities or cost not borne by motorists of transportation Social land use economic development and environmental impacts were identified and coincided with those concerns most often expressed by citizen or community advocacy groups Findings from the study illustrated the importance of matching the appropriate evaluation measures to the goals and objectives set forth early in the major investment study process
