Indonesia-Taiwan Economic Cooperation Arrangement: Is it Feasible? Adriana Elisabeth, Chaw Hsia Tu, 2014
Center for Political Studies Indonesian Institute of Science P2P LIPI and Chung Hua Institution for Economic Research CIER have been undertaking joint study on Indonesia Taiwan economic and trade relations since 2011 from the first year of the joint study the research teams have explored several potential sectors that Indonesia and Taiwan could develop in a more beneficial economic framework such and agriculture SMEs human resource development electronics and automotive It is common that in any economic transaction each party will try to get as much as possible benefits Although in reality different conditions will produce different advantages This situation is also reflected in the case of Indonesia and Taiwan economic and trade relations in which Taiwan seems to gain more benefits and opportunities rather than Indonesia because of its high economic performance advanced technology and good quality of human resources P2P LIPI continues the project in 2012 under the focus on Feasibility study of ECA between Indonesia and Taiwan by using two methodologies or tools First Global Trade Analysis Project GTAP is to analyze the impact of ECA in the general equilibrium and the aggregated level Second Single Market Partial Equilibrium Simulation Tool SMART is to analyze impact the ECA in the partial equilibrium and disaggregated level The Feasibility study covers two main aspects 1 potential impacts of ECA Indonesia and Taiwan s trade relations 2 potential regulatory cooperation between the two economics entities under the scheme of ECA To deal with the asymmetric positions between Indonesia and Taiwan government civil society and private sector must have the same knowledge and understanding on how to reduce the gaps This study has also shown a fruitful economic and trade relations between Indonesia Taiwan although there are some conditions that need to be considered First since Indonesia has no diplomatic ties with Taiwan the process of ECA will be much more difficult The preparational stage will be the most important part to negotiate any policy an single commodity in details including environmental factor This is primarily to reduce negative impact from Taiwan s FDI in Indonesia Indonesia must pay more attention in the domestic priorities trade and investment that must be negotiated carefully in the context of ECA This has to be the focus of the Indonesia s government policies Economic growth has to be parallel with the distribution of income Second Indonesia generally earns minimum benefits from the ongoing FTAs Therefore ECA has to be constructed for producing more economic advantages for Indonesia The most possible scenario under ECA is be strengthening the Private to Private P to P or Business to Business B to B ties The political reality remains that China has taken different political treatment to Taiwan In the regional context ASEAN also respects to the One China Policy although Taiwan has its own interpretation about the policy In the context of ECFA Economic Cooperation Framework Agreement China and Taiwan have different interpretations about ECFA

Policies to Support the Development of Indonesia's Manufacturing Sector during 2020-2024, 2019-01-01

Indonesia s gross domestic product growth rate declined significantly after the Asian financial crisis AFC of 1997 1998 The

country's potential and balance of payments growth rates are only about 5.5% and 3% respectively. One important reason is that the country's industrialization pace declined after the AFC. Today Indonesia is still exporting many unprocessed natural resources and simple manufactures not complex products with a low income elasticity of demand. This report analyzes how Indonesia's manufacturing sector could diversify and upgrade during 2020-2024 and beyond. This is essential if Indonesia is to attain upper middle income status as soon as possible. Policy makers and the private sector need to collaborate to identify the coordination failures that hamper the discovery of those products that Indonesia could successfully produce and export. These must be complex products with a high income elasticity of demand. The report proposes a number of policies to expedite this process.
