

Monitoring your progress by video – two weeks after injections.

- Good treatment relies on us assessing your face to see how well your botulinum toxin injections have worked. This allows us to maximise the effectiveness of your treatment.
- We appreciate it can be difficult to feel changes so we get patients to take video footage on their phone, tablet or computer **two weeks** after injections and then bring the video in with them to their next appointment.

When taking video make sure:

- Your hair (including fringe) is back off your face, your neck is showing and you are looking at the camera
- You have a plain background behind you and very bright lighting
- You are close to the camera (like the photos below) and not twisted

Please remember to bring the video along to your next appointment.

1		Relax your face and look at the video for 10 seconds	6		Do a big smile x 3
2		Raise eyebrows x 3	7		Show your teeth x 3
3		Close eyes gently x 3	8		Pucker your lips, blow or whistle x 3
4		Close eyes firmly x 3	9		Blow your cheeks out x 3
5		Smile with lips together x 3	<p>Notes about treatment*</p> <p>What worked well? Did anything cause problems?</p>		Notes:

Please remember that chemodenervation (botulinum toxin) injections cannot work alone and ongoing daily massage, stretches and exercises are essential in order to make long lasting improvements and maximum recovery.
