Engineers try to think "outside the box" in order to solve new problems or find ways to improve current solutions.
2. What is the most effective way to generate potential solutions to a problem? How many alternate solutions should you generate?
Brainstorming with a group, research and testing possible solutions. Deciding the number of possible solutions is based on many factors, e.g. the complexity of the project, the time available for implementation, the needs of the client, etc.
3. What is an engineer? What types of work do engineers do? Engineering is the application of mathematics and scientific principles to better or improve life. An engineer is a person who is trained in and uses technological and scientific knowledge to solve practical problems.
