Boot Information:

GRUB

grub GRUB is the GNand Unified Bootloader. This newer bootloader provides filesystem support, where it can use filenames as opposed to sector locations for the kernel, initrd, etc. This allows you to have a configuration file untouched and still be able to boot from a new kernel, change geometry on the drive, and change filesystems without problems. The GRUB boot loader gives you either a menu to choose predefined boot options from, or a command line interface for custom boot options.

grub-install

Installs grub onto the hard disk

LILO

lilo

LILO is Linux's oldest boot loader. LILO is typically in the MBR, but can be installed in the ROOT if it is partition. LILO cannot look beyond the first 1024 cylinders (8 GB) of the boot drive to find the boot loader UNLESS LBA mode is enabled.**

lilo -D desc

set LILO default OS (default=desc in lilo.conf)

lilo /etc/lilo.conf

LILO boot loader configuration file

Linux Kernel Boot Options:

single

Gain root access during boot prompt without password, can be used to fix some problems.

init=/bin/sh single

do the lilo prompt, start in single user mode. This is useful if you have forgotten your password. Boot to single user mode, then run the passwd command.

Mount — Options and Examples

mount -o loop,ro /dev/cdrom /mnt/cdrom

Mount the device cdrom and call it cdrom under the /mnt/cd directory
