

Answers to Study Guide for Chapter 1

Question 1: please write in your book

Key Terms and Concepts-Question 1

1. Contrast physical geography and cultural geography.

Physical geography deals with those elements of Earth that are natural in origin (such as mountains, weather, and climate), whereas cultural geography deals with elements of human influence (such as language, religion, and so on). For this reason, physical geography is sometimes referred to as environmental geography and cultural geography is sometimes referred to as human geography.

Key Terms and Concepts-Question 2

2. Briefly describe the atmospheric "sphere," stratosphere, hydrosphere, cryosphere, lithosphere, and biosphere.

atmosphere—the gaseous envelope of air that surrounds Earth (also is known for "air").

hydrosphere—water in all its forms, with the oceans making up the majority of it (often is known for "water").

Cryosphere—ice (subcomponent of the hydrosphere that consists of water that has become solid ice).

lithosphere—the solid, inorganic portion of Earth; it comprises the rocks of Earth's crust and the mineral matter that overlies the solid bedrock (often is known for "stone").

Biosphere—all the living organisms of Earth (also is known for "life").

Key Terms and Concepts-Question 3

3. In what ways do the inner-planet planets (the terrestrial and Jovian planets) of our solar system differ from each other?

The four inner planets are smaller, denser, and less oblate (they are more nearly spherical) than the four outer planets.

The inner planets rotate more slowly on their axes.

The inner planets are composed principally of solid material, and they have, except for Venus, Mercury, Mars, and relatively shallow atmospheres. The outer planets seem to be composed entirely of gases, principally hydrogen, with domes and turbulents of methane, their chemical composition is similar to that of the Sun.
