Gaining Ground Jennifer A. Clack, 2012-06-27 Around 370 million years ago a distant relative of a modern lungfish began a most extraordinary adventure emerging from the water and laying claim to the land. Over the next 70 million years this tentative beachhead had developed into a worldwide colonization by ever increasing varieties of four limbed creatures known as tetrapods the ancestors of all vertebrate life on land. This new edition of Jennifer A. Clack's groundbreaking book tells the complex story of their emergence and evolution. Beginning with their closest relatives the lobe fin fishes such as lungfishes and coelacanths Clack defines what a tetrapod is describes their anatomy and explains how they are related to other vertebrates. She looks at the Devonian environment in which they evolved describes the known and newly discovered species and explores the order and timing of anatomical changes that occurred during the fish to tetrapod transition.

Mastering Hurst Cycle Analysis Christopher Grafton, 2011-11-30 One of the best classical methods of technical analysis brought up to date. This book offers a modern treatment of Hurst's original system of market cycle analysis. It will teach you how to get to the point where you can isolate cycles in any freely traded financial instrument and make an assessment of their likely future course. Although Hurst's methodology can seem outwardly complex the logic underpinning it is straightforward. With practice the skill needed to conduct a full cycle analysis quickly and effectively will become second nature. The rewards for becoming adept are high conviction trades tight risk management and mastery of a largely non correlated system of analysis. In this extensive step by step guide you will find a full description of the principal tools and techniques taught by Hurst as well as over 120 colour charts together with tables and diagrams. The Update and TradeStation code for all of the indicators shown is also included. Find out more at <https://notes.hurstcycles.com>
