

Evolution Lab: Evidence Of Evolution

BACKGROUND: Much evidence has been found to indicate that living things have evolved or changed gradually during their natural history. The study of fossils as well as work in embryology, biochemistry, and comparative anatomy provides evidence for evolution.

OBJECTIVES: In this lab you will explore different type of evidence that supports the theory of evolution. You will learn about homologous, analogous, and vestigial structures, and examine evidence from embryology and the fossil record and explain their significance in evolution theory.
