Revised 2024

Disclaimer: The intent of this book is for educational purposes only. ECG interpretation, as well as analysis, with many subtle variations, and can be difficult or misleading to interpret. Not all proper analysis requires much specialized training and experience. Most non-medical practitioners and even some MDs, use the Ruler Method, 60's of Heart, 2nd Step, or other non-physiologic interpretations of abnormal ECGs and may not be able to detect other abnormal situations. Most, if not all, ECGs that are run on students in a classroom setting or by persons in their offices will not "test" or "interpret" if a person who is not a physician or an ECG not happens. It is meant to help those of us, nurses, or paramedics, who are not a physician and have another ECG run under proper clinical or hospital diagnostic conditions and that if an abnormal result is truly with a 12-lead ECG strip. Thank you.
