Farish,1993      **Crimes Against Nature** Rob White,2013-08-21 Crimes Against Nature provides a systematic account and analysis of the key concerns of green criminology written by one of the leading authorities in the field The book draws upon the disciplines of environmental studies environmental sociology and environmental management as well as criminology and socio legal studies and draws upon a wide range of examples of crimes against the environment ranging from toxic waste logging wildlife smuggling bio piracy the use and transport of ozone depleting substances through to illegal logging and fishing water pollution and animal abuse The book is divided into three parts Part 1 sets out theoretical approaches and perspectives on the subject Part 2 explores the national and international dimensions of environmental crime and the explanations for it Part 3 deals with the range of responses to environmental crime environmental law enforcement regulation environmental crime prevention and the role of global institutions and movements      An African Research Ethics Reader ,2024-06-11 Cultural research ethics is in a nascent phase within the field of research ethics as a whole and requires more attention and in depth articulation With specific case studies this vital volume provides unique perspectives on topics such as social autonomy vis a vis interests of individuals This volume assembles needed resources and case studies in cultural research ethics practices providing insight into current developments and future research directions It is a valuable contribution to cultural research ethics given the dearth of published literature available in this emerging field It is designed with two broad audiences in mind 1 African researchers and research organizations that want homegrown guidance about research ethics and 2 research ethicists worldwide who can use it to learn about cultural research ethics especially with respect to Africa      **Nature and Resources** ,1986      *Human Biology* Cecie Starr,Beverly McMillan,1995 This introductory book emphasizes human anatomy and physiology and briefly covers basic chemistry cells metabolism genetics evolution and ecology It contains hundreds of beautiful illustrations and photographs in full color      **Understanding Knowledge Societies** United Nations. Department of Economic and Social Affairs,2005 As with previous World Economic and Social Surveys this report examines recent developments and prospects for the world economy with particular reference to developing countries Part 1 examines the world economy in 2004 where a general improvement was detected but where the price of oil remains an uncertain factor Areas considered included growth employment and inflation Part 2 looked at international trade regional trends and outlook commodity prices and markets and trade policy developments Part 3 gives an overview of international finance including financial flows to developing and transition economies net transfer of financial resources various financial development schemes Part 4 measures the situation of the various world economies including the developed countries economies in

*Global Change* ,1989      **Science** ,2001      **Neural Dynamics of Neurological Disease** Christopher A.

Shaw,2017-02-15 The emerging understanding of age related neurological disorders suggests that notions of a single causal gene toxin being responsible is likely incorrect Neurological disorders probably arise due to a unique intersection of multiple genetic and toxic factors combined with additional contributions of age stage of development immune system actions and more This perspective leads to the view that rather than reflecting only one pathway to end state disease each is a spectrum disorder and every individual case is therefore unique Neural Dynamics of Neurological Disease argues for a fundamental rethinking of what we think we know about neurological disorders how they arise and progress and crucially what might be done to cure them It first introduces the concept of neural dynamics of neurological disease then examines various diseases and gives examples of the interplay of elements such as neural systems cell types and biochemical pathways that can contribute to disease The concluding chapters point the way to how the emerging notion of neurological disease as a dynamic process may lead to more successful treatment options Providing a cross disciplinary approach to understanding the origin and progression of neurological disease Neural Dynamics of Neurological Disease is a timely and valuable resource for

neuroscientists researchers and clinicians      **Human Security and the Environment** Edward Page,M. R. Redclift,2002 In the post Cold War era the pre eminent threats to our security derive from human degradation of vital ecosystems as well as the possibility of war and terrorist attack This substantial book examines this new security environment paradigm and the way in which the activities of societies are shifting the balance with nature The distinguished authors investigate this redefinition of security with particular reference to environmental threats such as climate change and the availability of adequate supplies of food and water They illustrate how unfettered economic growth rising levels of personal consumption and unsustainable natural resource and energy procurement are taking a heavy toll on the global environment This in turn is forcing both developed and developing countries to re evaluate the more immediate environmental security of their own populations For a truly global perspective the authors present a series of country case studies looking at issues of security and environment and comparing how they influence policy and human well being They also discuss a number of theoretical issues which underpin discussions of environmental security demonstrating that this is a relatively new and essentially contested concept This thought provoking book highlights the way in which both security and sustainability are being reworked as concepts and are being linked increasingly to social economic and cultural factors It will be of great interest to academics researchers and students in environmental management sociology geography international relations and politics
