Each chapter has clear applied value with an emphasis on doing theoretically driven work that has implications for social issues and problems. **Key Features** Offers a broad overview of interpersonal communication as an area of study, situating it historically, discussing advances in theory as well as application, and including a broad range of metatheoretical perspectives. **Traces** evolving trends during the past 30 years that have shaped the study of interpersonal communication and continue to make it relevant, including issues about the larger society such as globalization and technology, about the communication discipline such as fractionalization, and about interpersonal communication in particular, such as a focus on darker topics. **Includes** topics that range from evolutionary and dialectical perspectives on interpersonal communication to uncertainty and turbulence in interpersonal relationships to comforting and destructive patterns of communication. **Illustrates** how interpersonal communication research can be applied to such diverse topics as information management and privacy, family adaptation to medical diagnoses, and how writing blogs affects self-esteem. **Tells** the background stories of contributors, research programs, including why the topic matters, what they found, where their work is going, and lessons learned. *New Directions in Interpersonal Communication Research* is intended as a core text for graduate and upper-level undergraduate courses in Interpersonal Communication, Relational Communication, and Communication Theory. **Speech**
