## **Language Learning Beyond The Classroom:**

Language Learning Beyond the Classroom David Nunan, Jack C. Richards, 2015-01-30 This volume presents case studies of language learning beyond the classroom. The studies draw on a wide range of contexts from North and South America to Europe and the Asia Pacific region. Each provides principled links between theory, research and practice. While out of class learning will not replace the classroom, ultimately all successful learners take control of their own learning. This book shows how teachers can help learners bridge the gap between formal instruction and autonomous language learning. Although English is the primary focus of most chapters, there are studies on a range of other languages including Spanish and Japanese.

The Routledge Handbook of Language Learning and Teaching Beyond the Classroom Hayo Reinders, Chun Lai, Pia Sundqvist, 2022-05-30 Informal language learning beyond the classroom plays an important and growing role in language learning and teaching. This Handbook brings together the existing body of research and unites the various disciplines that have explored this area in order to present the current state of knowledge in one accessible resource. Much of adult learning takes place outside of formal education and for language learning it is likely that out of class experiences play an equally important role. It is therefore surprising that the role of informal language learning has received little attention over the years with the vast majority of research instead focusing on the classroom. Researchers from a range of backgrounds however have started to realise the important contribution of informal language learning both in its own right and in its relationship with classroom learning. Studies in the areas of learner autonomy, learning strategies, study abroad, language support, learners' voices, computer-mediated communication, mobile-assisted language learning, digital gaming and many others all add to our understanding of the complex and intersecting ways in which learners construct their own language learning experiences drawing from a wide range of resources including materials, teachers, self-study, technology, other learners and native speakers. This Handbook provides a sound and comprehensive basis for researchers and graduate students to build upon in their own research of language learning and teaching beyond the classroom. *Language beyond the Classroom* Jann Purdy, 2018-04-18 *Language beyond the Classroom* is an edited volume of essays that offers detailed how-to guides for developing, implementing and evaluating service learning programs for a variety of languages. issues The proliferation of digital language learning resources and tools is forcing language education into an era of unprecedented change The book will stimulate discussions on how to support language learners to construct quality autonomous technology mediated out of class learning experience outside the classroom and raise greater awareness of and research interest in this field Out of class learning constitutes an important context for human development and active engagement in out of class activities is associated with successful language development With convenient access to expanded resources venues and learning spaces today s learners are not as dependent on in class learning as they used to be Thus a deeper understanding of the terrain of out of class learning is of increasing significance in the current educational era Technology is part and parcel of out of class language learning and has been a primary source that learners actively use to construct language learning experience beyond the classroom Language learners of all ages around the world have been found to actively utilize technological resources to support their language learning beyond formal language learning contexts Insights into learners out of class autonomous use of technology for language learning are essential to our understanding of out of class learning and inform educators on how language learners could be better supported to maximize the educational potentials of technology to construct quality out of class learning experience *Autonomous Language Learning with*

Inaba, 2018-11-21 This book presents a comprehensive and detailed study of literacy practices and language use outside of the classroom by university students of Japanese. It investigates both tasks related to classes (e.g. homework and preparation for classes) and voluntary activities in the target language (e.g. watching TV and writing emails) and discusses how values, motivations, and types of activities differ between the two contexts. It employs sociocultural perspectives to observe reading and writing activities within and under the influence of individual and social contexts such as learner motives, peer networks, and the language classroom, and contributes to the related research areas in the field of second language acquisition such as motivation, autonomous language learning, and language learning strategies. Crucially, the book not only documents out-of-class literacy activities but also examines which teaching practices facilitate and promote such out-of-class language learning and use. It considers which literacy activities in the target language students undertake out of class, which factors encourage or discourage such out-of-class activity, and how and with which tools they undertake these activities. As such, the book provides guidance for classroom teaching and suggests that slight changes to teaching practices in the classroom may enhance autonomous learning outside the classroom.
