A Critical Analysis of the Usage of Selected Agile Project Management Methods in Change Management Anna-Lena Rohwedder,2017-10-18 Master s Thesis from the year 2017 in the subject Business economics Business Management Corporate Governance grade 1 85 University of Applied Sciences Osnabr ck language English abstract This thesis analyzes the effects of agility on the success of change management The goal is to answer the question whether and how the use of agile methods can be beneficial in this field by analyzing the impact of exemplary methods on distinct success factors of change management Agility is on trend Agile organizations will have a growing need for agile change frameworks in the future Therefore the discipline of change management could benefit from influences and inspirations from agile project management methods which have gained popularity in recent years The examples for agile methods chosen for analysis in this thesis are Scrum and Design Thinking Scrum is the method used most in software industry where the trend for agile project management has its roots In contrast Design Thinking stems from the area of innovation It is also described as the exact opposite of project management as we know it The two methods share many similarities like their focus on collaboration and an iterative process but they approach projects in different ways

Transfer security. Efficiency success in the focus of modern education controlling Maged Hassanien,2018-10-18 Scientific Essay from the year 2018 in the subject Business economics Controlling language English abstract The environment for further training has changed dramatically in recent years The increasing complexity and the decreasing half life of knowledge lead to an ever increasing demand on further training In addition new technologies and e learning are making a massive impact Further training must of course meet these new requirements Employees must always be prepared for current challenges and tasks as well as for changes in working methods e g increasing project work This is the mission of further education In addition to current knowledge soft skills must also be taught This task requires a clear goal orientation and a demand oriented allocation of activities Otherwise there is a risk of waste of resources inefficiency and overstrain non application of knowledge ineffectiveness
