Applying Dialogic Pedagogy Cynthia Z. Cohen, 2018-08-15 Recent academic research criticizes the effectiveness of traditional lecturing methods and instead shows the pedagogical effectiveness of active learning methods especially discussion based education Drawing on the dialogic writings of Bakhtin Freire and Habermas this study reviews the five primary themes cited in active learning research improvements in student concentration socialization in disciplinary norms scaffolding towards higher critical thinking inclusion of non traditional learning styles and reduction of student absenteeism Testing these findings in a discussion based undergraduate college education classroom this study finds significant improvements towards higher critical thinking skills increased student concentration and reduced student absenteeism However the study finds questionable effectiveness of discussion based teaching for socializing undergraduate college education students in disciplinary norms

Political Economy of Education in Lebanon Husein Abdul-Hamid, Mohamed Yassine, 2020-03-18 Education is a

source of national pride in Lebanon When the general public was asked how the education system was performing 76 percent of respondents had a positive opinion and these satisfaction rates have been consistently high over the years However perception of education quality does not reflect the reality of the sector and learning outcomes which are the determining metrics of success in education have been lower than the international average with a declining trend since 2007 This volume seeks to uncover why the education system in Lebanon is not reaching its full potential It uses a political economy approach to study the drivers and factors that guide education operations to produce and utilize education outcomes This includes the study of context stakeholders and processes that shape education policies institutions and activities It also aims to identify enablers of and constraints on policy change and implementation as well as the achievement of results In this context the analysis encompasses how education policies are developed how education consumables such as curricula textbooks and learning materials are produced distributed and used by learners how education services are delivered and monitored and how achieved results are measured It includes the identification of the most influential actors in the education arena as well as their vested interests It also examines unfavorable frameworks for action that are likely to block the adoption of reforms and delay or derail their implementation The system level analysis presented in this volume used a mixed method approach Qualitative and quantitative analyses were conducted based on a review and analysis of more than 1 900 research papers articles and books laws and policies expenditures trends and enrollment and outcome indicators Primary methods of inquiry were also used and included interviews focus group discussions and a household based perception survey

Teaching for Learning and Learning for Teaching Christopher Klopper, Steve Drew, 2015-10-30 Teaching for Learning and Learning for Teaching focuses on the emerging global governmental and institutional agenda about higher education teaching quality and the role that peer review can play in supporting improvements in teaching and student outcomes This agenda is a pervasive element of the further development of higher education internationally through activities of governments global agencies institutions of higher education discrete disciplines and individual teachers Many universities have adopted student evaluations as a mechanism to appraise the quality of teaching These evaluations can be understood as providing a customer centric portrait of quality and when used as the sole arbiter of teaching performance they do not instill confidence in the system of evaluation by academic teaching staff Providing peer perspectives as counterpoint whether in a developmental or summative form goes some way to alleviating this imbalance and is the impetus for the resurgence of interest in peer review and observation of teaching This book seeks to recognise cases of peer review of teaching in Higher Education to affirm best practices and identify areas that require improvement in establishing local national and international benchmarks of teaching quality [Health Informatics - E-Book](#) Ramona Nelson, Nancy Staggars, 2016-12-08 Awarded second place in the 2017 AJN Book of the Year Awards in the Information Technology category See how information technology intersects with health care Health Informatics An Interprofessional Approach 2nd Edition
