Creating Effective Teaching and Learning Spaces: Shaping Futures and Envisioning Unity in Diversity and Transformation Zilungile Lungi Sosibo, Eunice Ivala, 2021-09-07 Higher education in post apartheid South Africa was always likely to attract academic interest and yet there remains a dearth of research on creating teaching and learning spaces suitable for students from diverse backgrounds Using examples from higher education institutions across the Southern African Developing Community SADC region this volume explores the ways teaching and learning spaces are being used to advance the transformation agenda of higher education in these regions and provides concrete recommendations for the future The book is sure to appeal to academics from a variety of disciplines from African African American and ethnic studies to education and sociology It will be of particular interest to teacher trainers administrators and policy makers working in higher education and anyone else with a stake in managing cultural diversity in education *Opportunity to Learn, Curriculum Alignment and Test Preparation* Jaap Scheerens, 2016-08-30 This book provides a review of the effectiveness of Opportunity to Learn OTL operationalized as the association between OTL and student achievement In addition it presents an elaborate conceptual map in which OTL is regarded as part of a larger concept of curriculum alignment Major components of this framework are national goals and standards school curricula formative tests textbooks actual delivery of content as part of teaching and summative tests and examinations Alignment between educational goals intended and implemented curricula

and educational outcomes is considered an important prerequisite for effective education. The expectation is that better alignment leads to better student performance. The concept of OTL is commonly used to compare content covered as part of the implemented curriculum with student achievement. As such, it is to be seen as a facet of the broader concept of alignment. As it comes to enhancing OTL in educational policy and practice, proactive curriculum development is compared to a more retroactive orientation. Legitimate forms of test and examination preparation belong to this retroactive orientation and are seen as favorable conditions for optimizing OTL. This book reviews the research evidence on the effects of OTL on student achievement by means of detailed descriptions of key empirical studies, a review of meta-analyses, a vote count, syntheses of 51 empirical studies conducted between 1995 and 2015, and a secondary analysis based on TIMSS 2011 and PISA 2012 data. It concludes that the effect size of OTL at about 30 is modest but comparable in size to other effectiveness-enhancing conditions in schooling. The final chapter of the book provides suggestions for educational policy and practice to further optimize OTL.

Teaching Reading Comprehension to English Learners in Secondary Schools: A Research-Based Approach Cekiso, Madoda, Olifant, Florence, Mokhtari, Kouider, 2025-04-23. Teaching reading comprehension to English learners (ELs) in secondary schools presents unique challenges as these students must navigate the complexities of academic texts and the intricacies of language acquisition. Effective instruction requires a research-based approach that considers the diverse linguistic, cultural, and cognitive backgrounds of these learners. Recent studies highlight the importance of integrating strategies that build both language proficiency and content knowledge, essential for helping ELs develop the skills needed to comprehend complex materials. Fostering metacognitive awareness through strategies like summarizing, questioning, and making connections can empower students to become active and strategic readers. This approach recognizes the need for a supportive, inclusive classroom environment that encourages language development while promoting academic achievement in content areas. Further research may help educators provide English learners with the tools to thrive as capable readers in secondary school. Teaching Reading Comprehension to English Learners in Secondary School: A Research-Based Approach explores various aspects of teaching reading comprehension to English Second Language (ESL) learners in secondary schools. It examines current challenges and evidence-based strategies in reading comprehension. This book covers topics such as language learning, reading strategies, and teacher training, and is a useful resource for academicians, researchers, and scientists.

How to Write Better Medical Papers Michael Hanna, 2019-03-20 This book guides medical researchers through all stages of transforming their scientific data and ideas into a published paper.

Many researchers in medicine including the life sciences and health sciences struggle to get their research written and published. Manuscripts are typically rejected and/or sent back for revisions several times before ever being published. One reason for this is that researchers have not received much instruction in the specific subjects and skills needed to write and publish scientific medical papers: research methodology, ethics, statistics, data visualization, writing, revising, and the practicalities of publishing. Instead of wasting the reader's time discussing trivialities of punctuation, spelling, etc., this book tackles all the major scientific issues that routinely lead to manuscripts getting rejected from the journals. The section *Preparing* covers the range of methodological, ethical, and practical aspects that researchers need to address before starting to write their paper. The section *Analyzing* reviews commonplace problems in the statistical analysis and presentation and how to resolve those problems. The section *Drafting* describes what to write in all the various parts of a paper: the Introduction, Methods, Results, Discussion, Abstract, etc. The section *Revising* explains and illustrates how to improve the writing style of any manuscript. The section *Publishing* discusses how to navigate the peer review process and all other practical aspects of the publishing phase. This book draws on the author's decade of experience as an independent medical writer and research consultant, but it is not written merely as the personal opinion of yet another expert. The entire book is grounded in the existing scientific and scholarly literature, with extensive references and a lengthy annotated bibliography so readers can quickly obtain more information on any aspect they want. Thus, this book provides a more evidence-based, scholarly account of how medical scientific papers should be written in order to improve medical communication and accelerate scientific progress. After reading this entire book, cover to cover, medical researchers will know how to write better quality medical papers and they will be able to publish their work in better journals with less time and struggle. This book is essential reading for anyone conducting research in clinical medicine, life sciences, or health sciences.

The authors present a comprehensive picture of how multiple language ideologies interact and play out as language policy against a background of political turmoil in a country with a complex history of indigenous and colonial languages. They utilize critical perspectives from Sociolinguistics and Applied Linguistics and add Critical Discourse Studies and a Discourse Historical Approach to produce a model of LPP for scholars in other settings to describe and work to improve their own specific language contexts.
