Lanl Engineering Manual:

Design-Load Basis for LANL Structures, Systems, and Components I. Cuesta, 2004 This document supports the recommendations in the Los Alamos National Laboratory LANL Engineering Standard Manual ESM Chapter 5 Structural providing the basis for the loads analysis procedures and codes to be used in the ESM It also provides the justification for eliminating the loads to be considered in design and evidence that the design basis loads are appropriate and consistent with the graded approach required by the Department of Energy DOE Code of Federal Regulation Nuclear Safety Management 10 Part 830 This document focuses on 1 the primary and secondary natural phenomena hazards listed in DOE G 420 1 2 Appendix C 2 additional loads not related to natural phenomena hazards and 3 the design loads on structures during construction

Managing for High-Quality Science and Engineering at the NNSA National Security Laboratories National Research Council, Division on Engineering and Physical Sciences, Laboratory Assessments Board, Committee to Review the Quality of the Management and of the Science and Engineering Research at the Department of Energy's National Security Laboratoriesâ"Phase I, 2013-09-20 The three National Security Laboratories Los Alamos National Laboratory LANL Sandia National Laboratories SNL and Lawrence Livermore National Laboratory LLNL are managed by private sector entities under contract to the National Nuclear Security Administration NNSA The FY2010 Defense Authorization Act mandated that NNSA task the National Research Council NRC to study the quality and management of Science and Engineering S E at these Laboratories This study addressing a total of 5 tasks is being conducted in two phases This report covers the first phase which addresses the relationship between the quality of the science and engineering at the Laboratory and the contract for managing and operating the Laboratory task 4 and also addresses the management of work conducted by the Laboratory for entities other than the Department of Energy task 5 The study's second phase will evaluate the actual quality of S E in key subject areas Managing for High Quality Science and Engineering at the NNSA National Security Laboratories presents assessments of the evolution of the mission of the NNSA Labs and the management and performance of research in support of the missions and the relationship between the Laboratory Directed Research and Development LDRD program and the ability of the Labs to fulfill their mission The report examines the framework for managing science and engineering research at the Labs and provides an analysis of the relationships among the several players in the management of the Labs the NNSA the site offices the contractors and the Lab managers and the effect of that relationship on the Laboratories ability to carry out science and engineering research

 and highlights a number of safety and technical issues that should be resolved The report provides an assessment of the
 safety management safety review and safety methodology employed by the Department of Energy and the private contractors
 who operate the reactors for the federal government This report examines the safety objective established by the Department
 of Energy for the production reactors and the process the Department of its contractors use to implement the objective
 focuses on a variety of uncertainties concerning the production reactors particularly those related to potential vulnerabilities
 to severe accidents and identifies ways in which the DOE approach to management of the safety of the production reactors
