

Lab 10 - Quantum Entanglement Simulation

Simulation of quantum entanglement for two particles, showing their correlated behavior.

Quantum entanglement is a phenomenon where two particles become linked in such a way that the state of one particle is dependent on the state of the other, even when they are separated by large distances.

This correlation persists regardless of the distance between the particles, a feature that defies classical intuition.

It is a fundamental aspect of quantum mechanics, often described as "spooky action at a distance."
