Maps and Mapping in Children's Literature Nina Goga, Bettina Kümmerling-Meibauer, 2017-08-15 Maps and Mapping in Children s Literature is the first comprehensive study that investigates the representation of maps in children s books as well as the impact of mapping on the depiction of landscapes seascapes and cityscapes in children s literature The chapters in this volume pursue a comparative

approach as they represent a wide spectrum of diverse genres and national children's literatures by examining a wealth of children's books from Canada, Denmark, Germany, Italy, Norway, Russia, the United Kingdom, and the USA. The theoretical and methodological approaches range from literary studies, developmental psychology, maps and geography, literacy, ecocriticism, historical contextualization with both new historicist and political historical leanings, and intermediality to materialist cartographies, cultural studies, island studies, and genre studies. By this, this volume aims at embedding children's literature in a broader field of literary and cultural studies, thus situating children's literature research within a general context of literary theory.

The texts are designed to be helpful to numerous readers, ranging from students first encountering science fiction to experienced scholars in the field.
