

Task 2: DNA Replication

The newly synthesized or copies (daughter molecules) synthesized by an individual's parental molecules are known as semi-conservative molecules. This means that each daughter molecule consists of one parental molecule and one newly synthesized molecule. This process is known as semi-conservative replication. The newly synthesized molecules are known as daughter molecules.

The genetic information (instructions) for the development, function, growth, and reproduction of an organism is contained in the total gene pool of the organism. This information is passed on to the next generation through the process of reproduction. The genetic information is passed on through the process of reproduction.

Genetic Information
