B	BB	Bb
b	Bb	bb

2. Punnett Square B:

	B	b
b	Bb	bb
b	Bb	bb

- In the cross between two black guinea pigs shown in Punnett Square A, what is the probability that an offspring will be black? White? 75% Black  
25% White
- Is it possible that the cross between two black guinea pigs in Punnett Square A would not produce a white guinea pig? Explain. Yes, there is a 75% chance that the offspring will be black.
- What color are the guinea pig parents in the cross shown in Punnett Square B?
- Which guinea pig parental in Punnett Square B is homozygous? Which is heterozygous? Explain how you know. Bb is black and bb is white. Bb is homozygous because they are both the same alleles and bb is heterozygous because there are two different alleles.
- Calculate the probability that an offspring will be black in the cross in Punnett Square B. What is the probability that an offspring will be white? 50% chance that the offspring will be black and 50% chance the offspring will be white.

The rise of the neutral theory of molecular evolution seems to have aroused a renewed interest in mathematical population genetics among biologists who are primarily experimenters rather than theoreticians This has encouraged me to set out the mathematics of the evolutionary process in a manner that I hope will be comprehensible to those with only a basic knowledge of calculus and matrix algebra I must acknowledge from the start my great debt to my students Equipped initially with rather limited mathematics they have pursued the subject with much enthusiasm and success This has enabled me to try a number of different approaches over the years I was particularly grateful to Dr L J Eaves and Professor W E Nance for the opportunity to give a one semester course at the Medical College of Virginia and I would like to thank them their colleagues and their students for the many kindnesses shown to me during my visit I have concentrated almost entirely on stochastic topics since these cause the greatest problems for non mathematicians The latter are particularly concerned with the range of validity of formulae A sense of confidence in applying these formulae is almost certainly best gained by following their derivation I have set out proofs in fair detail since in my experience minor points of algebraic manipulation occasionally cause problems To avoid loss of continuity I have sometimes put material in notes at the end of chapters
