**Physics with Modern Physics for Scientists and Engineers** Richard Wolfson, Jay M. Pasachoff, 1999 **Dynamic Decision Theory** G. Haag, 2012-12-06 Choice processes appear in all spheres of society Hitherto ruling paradigms in the modelling of choice problems have presumed a competitive general equilibrium which however proves insufficient for dynamic processes This contribution aims at providing a general coherent and closed framework for the dynamic modelling of decision processes It was one of my main interests to build a bridge between the pure model building concepts and their practical applications Therefore all given examples are related to empirical work Solution algorithms for the estimation of trend parameters as well as the numerical simulation in concrete applications therefore play a central role in this contribution Friendly relations with a number of
