*Blueprint*, 2001     *Runways & Racers* Terry O'Neil, 2022-02-07 *Runways and Racers* concentrates on the short transitional period 1952-1954 for sports car racing in America following the ban on public road racing in many of the States. The ban left the rapidly expanding Sports Car Club of America with a problem where to hold races. At precisely the same time Curtis LeMay, head of Strategic Air Command, was having problems obtaining funds from Congress to improve conditions on the many air bases located around the country. The solution was a marriage of convenience whereby the SCCA was allowed access to active SAC air bases to hold its race programmes. In return, the SAC base would receive the net profits from the event, which would be put into the Airmen's Living Improvement Fund. As a result of some initial financial success for the SAC bases, the scheme was also adopted by non-SAC bases together with regional clubs with the same agreement in place. Complaints from airmen alerted Congressman Errett Scrivner to potential irregularities, and he ordered an audit to be conducted to ascertain precisely what it was costing the air bases to host the races. His findings led to the cessation of the races ordered by Congress. The product of a long period of extensive research by the author, this book gives a fascinating insight into this two-year period, complemented by over 150 period pictures, many previously unpublished.     **Northeast**

**American Sports Car Races** Terry O'Neil, 2022-02-07 The growth of sports car racing in Northeast America was not painless. Tragedy, mystery, subterfuge, intrigue, and an adherence to a particular club philosophy all featured in its story during the 1950s when professionalism in the sport was always bubbling under the surface. The northeast area of America has long been considered the cradle of post-World War II sports car racing; the Sports Car Club of America was founded there, and it was the entry point to America for a host of European sports cars. Early in the 1950s, road races had been permitted by some State authorities, but due to fatal accidents, a ban on such racing came into effect. Forced to find alternative venues, the motor clubs were attracted to civil airports and a few military bases. But the drivers craved more challenging venues on which to hone their skills. This resulted in a few individuals chancing their reputation and a great deal of money, opening purpose-built circuits. This book gives a unique insight into this intriguing journey through the decade. Extensively researched, the compelling story and stunning contemporary photos, many previously unpublished, paint a fascinating portrait of a nascent sport coming into its own.     Subaru Impreza Brian Long, 2006 Perceived as a replacement for the long-running Leone, the Impreza quickly gained a great reputation through Subaru's successful WRC program. This book covers the full story of the Impreza from concept through to the current production car, looking at the rally machines along the way and illustrated throughout with contemporary material. Now with over 400 mainly color pictures and significant additional text, this is a fantastic work and all account of an amazing car.

**Scooter Lifestyle** Ian Grainger, 2014-09-16 There has been plenty said and written about scooters over the years, but until now there has been no definitive look at the culture surrounding our chosen way of life. Many authors have written about mods and the infamous and often over-hyped beach battles of the 1960s.

but hardly any have tried to capture the atmosphere of the modern scene in print We still owe the original mods for fuelling the imagination of past present and future generations and for leaving a rich scooter heritage behind them Although the mod way of life was the spark which lit the fuse for many of us the majority of scooter riders have evolved into lifestyle scooterists We may not dress in a particular style our scooters may not be adorned with lights and mirrors but we still burn with the same passion as our scooter riding ancestors It s over sixty years since the first Italian scooters rolled off the production lines but there is still a buzzing and vibrant lifestyle surrounding them The small capacity machines have overtaken the lives of thousands of us often to the detriment of everything else we hold dear Careers relationships and families have suffered for this overwhelming and expensive addiction An addiction to which there is no cure We live and breathe the sickly sweet smell of synthetic two stroke oil and worship at the altar of our chosen gods Lambretta and Vespa or occasionally Gilera and Italjet Our hands are permanently ingrained with the oily tattoo s of a thousand engine rebuilds and our major organs have suffered the long term effects of our hedonistic lifestyle Including interviews with well known scootering personalities over 150 colour photographs of award winning custom scooters best selling scooter models and information on rallies and events this book is a must have for anyone interested in these fun machines

**The Rebirth of Education** Lant Pritchett,2013-10-14 Despite great progress around the world in getting more kids into schools too many leave without even the most basic skills In India s rural Andhra Pradesh for instance only about one in twenty children in fifth grade can perform basic arithmetic The problem is that schooling is not the same as learning In *The Rebirth of Education* Lant Pritchett uses two metaphors from nature to explain why The first draws on Ori Brafman and Rod Beckstrom s book about the difference between centralized and decentralized organizations The Starfish and the Spider Schools systems tend be centralized and suffer from the limitations inherent in top down designs The second metaphor is the concept of isomorphic mimicry Pritchett argues that many developing countries superficially imitate systems that were successful in other nations much as a nonpoisonous snake mimics the look of a poisonous one Pritchett argues that the solution is to allow functional systems to evolve locally out of an environment pressured for success Such an ecosystem needs to be open to variety and experimentation locally operated and flexibly financed The only main cost is ceding control the reward would be the rebirth of education suited for today s world
