

1.4.2 Expansion enclosure

The optional IBM Storwize V3700 expansion enclosure contains two expansion canisters, disk drives, and two power supplies.

Figure 1-7 shows an overview of the expansion enclosure.

Figure 1-7 Expansion enclosure of the IBM Storwize V3700

The expansion enclosure power supplies are the same as the control enclosure. There is a single power lead connector on each power supply unit.

Figure 1-8 shows the expansion canister ports.

Figure 1-8 Expansion canister ports

Each expansion canister that is shown in Figure 1-8 provides two SAS interfaces that are used to connect to the control enclosure and any optional expansion enclosures. The ports are numbered 1 on the left and 2 on the right. SAS port 1 is the IN port and SAS port 2 is the OUT port.

The use of the SAS connector 1 is mandatory, because the expansion enclosure must be attached to a control enclosure or another expansion enclosure. SAS connector 2 is optional, because it is used to attach to more expansion enclosures.

Each port includes two light-emitting diodes (LEDs) to show the status. The first LED indicates the link status, and the second LED indicates the fault status.
