Bujosa Vadell,2024-12-05 This edited volume examines the impact of the metaverse on finance and law As the commercial development of the internet and digital technology has done for more than thirty years the metaverse phenomenon raises questions about the relevance of existing legal rules in dealing with new practices between the need for adaptation evolution or new rules While the Blockchain ecosystem has developed steadily over the last few years and its applications are still evolving can we assume that the metaverse will become the most prodigious phenomenon of the 21st century The term metaverse refers to a virtual world Technically using known but evolving technologies the term refers to a network of 3D virtual worlds In its current state of development there is a metaverse and not a single virtual world as there is an internal one simply because its development is still dependent on proprietary technologies The development of the metaverse is no less accurate and a few recent examples suggest that lawyers will not be able to escape this phenomenon which looks set to involve individuals companies and institutions The financial world is not immune to the emergence of the metaverse either Traditional finance is moving into new virtual worlds Several banks and insurance companies are entering this world far removed from their traditions Some have even set up branches there However what are these financial institutions trying to achieve by entering this market segment This book addresses these questions with contributions from academics and experts from both fields

Empirical Studies of an Internet and Service Based Economy Nabaz T. Khayyat,Goran M. Muhamad,2023-07-07 This book is a collection of eight studies covering several areas pertinent to the current technological and banking services situation in the Kurdistan region of Iraq The economy of the Kurdistan Region of Iraq KRI is mainly dependent on oil revenue The oil export revenue

constitutes more than 90% of the government's fiscal revenue. In addition to that, the public sector plays an excessive role in the economy with public spending to GDP being over 70% while revenue from taxation constitutes less than 30% of total revenue. As the economy is not diversified, there is a large gap between demand and supply of locally produced tradeable goods, leaving the KRI economy highly dependent on imports. Another structural challenge of the KRI economy is its dependence on cash and a weekly financial system. Although the region has witnessed extraordinary economic growth from 2008 to 2014, the growth rate decreased from 8 to 1 percent, trade and investment dropped to 5 percent, and the unemployment rate significantly increased to over 20% by the end of the year 2019. To maintain the progress of economic development, it is necessary to upgrade the country's industrial structure in order to be able to generate more value-added products, which requires advancement in technological infrastructure to employ more sophisticated technologies. There is not much written about Kurdistan and its economy, and yet there is a comprehensive development plan and resources to be used for education, research, rehabilitation, development, and reconstruction. As such, this book would be of interest to researchers, decision makers, governmental and non-governmental organizations, undergraduate and graduate students, and the general public with an interest in the Middle East and contemporary Kurdish issues. It is a good up-to-date handbook for policymakers and NGOs involved in the rehabilitation, reconstruction, and development of Iraq.
