Learn To Drive Manual Transmission Class:

Learning to Drive David Michael Stavens, 2011 Every year 1.2 million people die in automobile accidents and up to 50 million are injured. Many of these deaths are due to driver error and other preventable causes. Autonomous or highly aware cars have the potential to positively impact tens of millions of people. Building an autonomous car is not easy. Although the absolute number of traffic fatalities is tragically large, the failure rate of human driving is actually very small. A human driver makes a fatal mistake once in about 88 million miles. As a co-founding member of the Stanford Racing Team, we have built several relevant prototypes of autonomous cars. These include Stanley, the winner of the 2005 DARPA Grand Challenge, and Junior, the car that took second place in the 2007 Urban Challenge. These prototypes demonstrate that autonomous vehicles can be successful in challenging environments. Nevertheless, reliable, cost-effective perception under uncertainty is a major challenge to the deployment of robotic cars in practice. This dissertation presents selected perception technologies for autonomous driving in the context of Stanford's autonomous cars. We consider speed selection in response to terrain conditions, smooth road finding, improved visual feature optimization, and cost-effective car detection. Our work does not rely on manual engineering or even supervised machine learning. Rather, the car learns on its own, training itself without human teaching or labeling. We show this self-supervised learning often meets or exceeds traditional methods. Furthermore, we feel self-supervised learning is the only approach with the potential to provide the very low failure rates necessary to improve on human driving performance.

What Makes You Bloom Kevin Miguel Garcia, 2024-01-09 Get ready to heal from your past, get real about the present, and imagine a delicious future by rebuilding a living practice that actually works for you. So many of us are leaving conservative faith traditions behind, rightly saying goodbye to toxic theology, bigotry, and harm. But in the process, we often lose our rhythm of gathering, prayer, and worship. We may even lose our sense of connection to God. And we think it's our fault. But spiritual coach, speaker, and podcaster Kevin Miguel Garcia is here with a reminder: We don't need saving because we were never in danger. We don't need to get found because we've never been lost. Everything we need to connect with the Divine is already inside us. **What Makes You Bloom** is a guide to creating your new spiritual practice after your life or faith has fallen apart. When going to church, praying, and reading your Bible just doesn't cut it or outright disturbs you, this book will show you how to cultivate new, meaningful spiritual practices like stillness, presence, breath, and movement that will help you overcome the pain of your past and root yourself in the present. Through stories, insights, and guided meditations, Garcia explains how the goal of every spiritual practice should be about the attainment of peace, about finding what truly makes you bloom. Along the way, you will discover that the smallest changes in your life can bring about the biggest transformations, and that a feeling of bliss is only a few breaths away.
