Ward, 2020-05-28 Neurorehabilitation is an expanding field with an increasing clinical impact due to an ageing population  
During the last 20 years neurorehabilitation has developed from a discipline with little scientific background separated from  
other medical centers to a medical entity largely based on the principles of evidenced based medicine with strong ties to  
basic research and clinical neurology Today neurorehabilitation is still a work in progress and treatment standards are not  
yet established for all aspects of the field There are very few books that address contemporary neurorehabilitation from this  
perspective This new edition of the Oxford Textbook of Neurorehabilitation provides an understanding of the theoretical  
underpinnings of the subject as well as a clear perspective on how and why to approach treatment decisions on an  
individualized basis The book has been thoroughly updated to reflect novel important developments in the field and includes  
new chapters on vocational rehabilitation self management strategies in neurorehabilitation and music supported therapy in  
neurorehabilitation This indispensable book will be of great interest to rehabilitation physicians neurologists and allied  
health care professionals who look after patients requiring neurorehabilitation      Who's who in the West ,1965
