

EPSRC grant application – data management plan

What do I need to cover in my data management plan?

Even though the EPSRC does not evaluate data management plans as part of the grant application process, they are clear that all well managed publicly-funded research should include, from the outset, consideration of any potential issues with future data sharing. It is therefore good practice to prepare a data management plan. If applicable, your data management plan should also describe possible solutions to problems with data sharing. Deciding on a research data sharing strategy from the outset of your research may spare you difficulties towards the end of your project. We also encourage you to outline your data sharing intentions, and any constraints that may apply, in your grant application, as even though the EPSRC does not require your plan, this will potentially demonstrate additional value in your proposed research to those who peer review your application.

The EPSRC does not provide templates for data management plans. The next page shows suggested questions you might wish to consider answering in your data plan (suggestions come from the University of Cambridge). All writing in italics contains guidelines on how you might want to address these questions.
