

Student Exploration: Half-life

Essential Question: How does the half-life of a substance change as the amount of substance decreases?

1. Use the simulation to explore the relationship between half-life and amount of substance. The simulation starts with 1000 particles. How many particles are left after one half-life? After two half-lives? After three half-lives? After four half-lives? After five half-lives? After six half-lives? After seven half-lives? After eight half-lives? After nine half-lives? After ten half-lives?

2. How does the half-life of a substance change as the amount of substance decreases?

Artificial Intelligence: Methodology, Systems, and Applications Darina Dicheva, Danail Dochev, 2010-09-03 The 14th International Conference on Artificial Intelligence Methodology Systems Applications AIMSAs 2010 was held in Varna Bulgaria during September 8-10, 2010. The AIMSAs conference series has provided a biennial forum for the presentation of artificial intelligence research and development since 1984. The conference covers the full range of topics in artificial intelligence, AI, and related disciplines and provides an ideal forum for international scientific exchange between Central Eastern Europe and the rest of the world. The 2010 AIMSAs edition continued this tradition. For AIMSAs 2010 we decided to place special emphasis on the application and leverage of AI technologies in the context of knowledge societies where knowledge creation, accessing, acquiring, and sharing empower individuals and communities. A number of AI techniques play a key role in responding to these challenges. AI is intensively used in the development of systems for effective management and flexible and personalized access to large knowledge bases in the Semantic Web technologies that enable sharing and reuse of and reasoning over semantically annotated resources in the emerging social Semantic Web applications that aid humans to collaboratively build semantics in the construction of intelligent environments for supporting human and agent learning etc. In building such intelligent applications, AI techniques are typically combined with results from other disciplines such as the social sciences, distributed systems, databases, digital libraries, information retrieval, service-oriented applications, etc.
