John Agnew, 2020-12-17 The word territory has taken on renewed significance in a world where its close association with state sovereignty has made a serious comeback invoked alike by proponents of Brexit in the UK Making America Great Again in the USA and myriad populists from India to Brazil by way of Italy and Hungary The word has had a contentious history in social science and political theory In its first seven years the journal *Territory Politics Governance* has published numerous articles examining the ways in which territory figures into contemporary political debates and its limits as a concept when applied to a world in which sovereignty never has simply pooled up within self evidently distinctive blocs of space named as territories Among other things the limits of territory are apparent in terms of the history of a global capitalism that always

bursts beyond established boundaries the fact that some states are much more powerful and exercise much more spatial reach than do others and that the political uses of territory in its current usage date back predominantly to seventeenth century Europe rather than being historically transcendental or worldwide The articles in this book are selected from Territory Politics Governance to survey many of the dilemmas and questions that haunt the concept of territory even as its current efflorescence in political discourse ignores them Handbook of Cities and the Environment Kevin Archer, Kris Bezdecny, 2016-12-30 With an ever growing majority of the world's human population living in city spaces the relationship between cities and nature will be one of the key environmental issues of the 21st Century This book brings together a diverse set of authors to explore the various aspects of this relationship both theoretically and empirically Rather than considering cities as wholly separate from nature a running theme throughout the book is that cities and city dwellers should be characterized as intrinsic in the creation of specifically urban generated socio natures *Saving More Than Seeds* Catherine Phillips, 2016-04-01 *Saving More Than Seeds* advances understandings of seed people relations with particular focus on seed saving The practice of reusing and exchanging seeds provides foundation for food production and allows humans and seed to adapt together in dynamic socio-natural conditions But the practice and its practitioners are easily taken for granted even as they are threatened by neoliberalisation Combining original ethnographic research with investigation of an evolving corporate seed order this book reveals seed saving not only as it occurs in fields and gardens but also as it associates with genebanking genetic engineering intellectual property rights and agrifood regulations Drawing on diverse social sciences literatures Phillips illustrates ongoing practices of thinking feeling and acting with seeds raising questions about what seed people relations should accomplish and how different ways of relating might be pursued to change collective futures *Mountain Ice and Water* John F. Shroder, Gregory B Greenwood, 2016-11-18 *Mountain Ice and Water* Investigations of the Hydrologic Cycle in Alpine Environments is a new volume of papers reviewed and edited by John Shroder Emeritus Professor of Geography and Geology at the University of Nebraska at Omaha USA and Greg Greenwood Director of the Mountain Research Initiative from Bern Switzerland Chapters in this book were derived from research papers that were delivered at the Perth III Conference on Mountains of our Future Earth in Scotland in October 2015 The conference was established to help develop the knowledge necessary to respond effectively to the risks and opportunities of global environmental change and to support transformations toward global sustainability in the coming decades To this end the conference and book have investigated the future situation in mountains from three points of view 1 Dynamic Planet Observing explaining understanding and projecting Earth environmental and societal system trends drivers and processes and their interactions to anticipate global thresholds and risks 2 Global Sustainable Development Increasing knowledge for sustainable secure and fair stewardship of biodiversity food water health energy materials and other ecosystem services and 3 Transformations towards Sustainability Understanding transformation processes and options assessing how these relate to

human values emerging technologies and social and economic development pathways and evaluating strategies for governing and managing the global environment across sectors and scales Derived from research papers delivered at the Perth III Conference on Mountains of our Future Earth in Scotland in October 2015 Helps develop the knowledge necessary for responding effectively in coming decades to the risks and opportunities of global environmental change and tactics for global sustainability Provides the research community working on global change in mountains with a broader framework established by the Future Earth initiative

Journal of Geoscience Education, 1996 **Environment & Planning**, 2012 *Cognitive and Linguistic Aspects of Geographic Space* D.M. Mark, Andrew U. Frank, 2012-12-06 This book contains twenty eight papers by participants in the NATO Advanced Study Institute ASI on Cognitive and Linguistic Aspects of Geographic Space held in Las Navas del Maxques Spain July 8 20 1990 The NATO ASI marked a stage in a two year research project at the U S National Center for Geographic Information and Analysis NCOIA In 1987 the U S National Science Foundation issued a solicitation for proposals to establish the NCGIA and one element of that solicitation was a call for research on a fundamental theory of spatial relations We felt that such a fundamental theory could be searched for in mathematics geometry topology or in cognitive science but that a simultaneous search in these two seemingly disparate research areas might produce novel results Thus as part of the NCGIA proposal from a consortium consisting of the University of California at Santa Barbara the State University of New York at Buffalo and the University of Maine we proposed that the second major Research Initiative two year multidisciplinary research project of the NCOIA would address these issues and would be called Languages of Spatial Relations The grant to establish the NCOIA was awarded to our consortium late in 1988
