Exclusion and Inclusion in International Migration: Power, Resistance and Identity Armağan Teke Lloyd, 2019-04-30 People on the move face new barriers in a globalizing world Some of these barriers are related with the rise of an increasingly security oriented approach towards international migrants Notwithstanding the forces of globalization states have maintained their monopoly power over whom to admit and whom to deny within their borders In other words they remain the sovereign authority regulating the entry and exit of people However in recent years a number of states have singled out international immigration as the greatest political and social threat to their cultural and national security The securitization of immigration is founded upon the premise that the international movement of people represents an exceptional risk for the survival of the nation and this is often associated with terrorism instability and criminality The securitization of immigration is also based on the idea that the traditional authority vested in states to regulate immigration is somehow insufficient and needs to be enhanced These assumptions correspond with a real policy shift in some countries such as the United States where the government is planning to spend approximately 23 Billion Dollars on border security and immigration enforcement in 2019 alone This edited volume is an exploration of the global landscapes inhabited by refugees and labour migrants although the focus is largely on the former Despite the fact that most of the empirical studies are drawn from within Europe the book also includes research on Nepal Australia the Middle East and Japan in order to reveal the truly global dimensions of migration and the regimes governing this Content INTRODUCTION by Arma an Teke Lloyd PART A Ideology and Governance of Migration CHAPTER 1 Coming to Terms with Liberal Democracy by the Populist Radical Right Parties of Western Europe Evidence from European Parliament Speeches over Minorities and Migration by Caner Tekin CHAPTER 2 A Forest with many trees Mapping migration governance and the dispersion of authority in Europe by Lisa Marie Borrelli Rebecca Mavin and Giorgia Trasciani CHAPTER 3 Policing Migrants in Transit and Upon Arrival The Bordering Tactic of Integration in Austria and Germany by Olivia Johnson PART B Regulations Suspension of Human Rights CHAPTER 4 Borders Exception and Sovereignty Australia s Migration Policies as Instruments of Suspension of Human Rights and International Obligations by Ana Carolina Macedo Abreu CHAPTER 5 Power and Sandwiche d Sovereignty Nepali Migrant Workers in the Gulf Countries by Hari KC CHAPTER 6 The Body and Embodied Experiences in the British Asylum System Developing a Conceptual Perspective by Rebecca Mavin

Borderless Worlds for Whom? Anssi Paasi, Eeva-Kaisa Prokkola, Jarkko Saarinen, Kaj Zimmerbauer, 2018-10-25 The optimism heralded by the end of the Cold War and the idea of an emerging borderless world was soon shadowed by conflicts wars terrorism and new border walls Migrants asylum seekers and refugees have simultaneously become key political figures Border and mobility studies are now two sides of the same coin The chapters of this volume reflect the changing relations between borders bordering practices and mobilities They provide both theoretical insights and contextual knowledge on how borders bordering practices and ethical issues come together in mobilities The chapters scrutinize how bounded territorial and open networked relational spaces manifest in various contexts The first section Borders in a borderless world raises theoretical questions The second Politics of inclusion and exclusion looks at bordering practices in the context of migration The third section Contested mobilities and encounters focuses on tourism which has been an accepted form of mobility but which has recently become an object of critique because of overtourism Section four Borders security politics examines bordering practices and security in the EU and beyond highlighting how the migration border politics nexus has become a national and supra national political challenge The chapters of this interdisciplinary volume contribute both conceptually and empirically to understanding contemporary bordering practices and mobilities It is essential reading for geographers political scientists sociologists and international relations scholars interested in the contemporary meanings of borders and mobilities

Neutral Beyond the Cold Pascal Lottaz, Heinz Gärtner, Herbert R. Reginbogin, 2022-06-27 The collapse of the Soviet Union and the wars in Yugoslavia radically changed the security environment in Europe and Central Asia Some predictions assumed the emerging unipolarity of the liberal world order would end neutrality policies in East and West but as this volume shows this was not the case While some traditional Cold War neutrals like Sweden and Finland have been edging closer to security alignment with western institutions there are others like Austria Switzerland Ireland and Malta that remained committed to their traditional nonaligned foreign policy approaches More importantly there are areas of Eurasia that developed new forms of neutrality policies most of them only noticed on the margins of academic discourse This is the first book to systematically explore this new neutralism of the Post Cold War In part one the book analyzes contemporary neutrality discourse on several levels like international organizations UN ASEAN diplomacy and academic theory Part two

discusses neutrality related policy developments in Belarus Moldova Ukraine Georgia Serbia Turkmenistan Afghanistan and Mongolia Together the 15 chapters show how on this vast connected landmass references to neutrality have remained a staple of international politics **The British Library General Catalogue of Printed Books to 1975** British Library,1979
