Design ,2004      **Low-impact Development** ,2000      **Lowimpact development an integrated design approach** ,2017 This thesis investigates sustainable storm water management in an alpine case study in the eastern part of Innsbruck Firstly the focus lies on the ecological properties of concepts such as Low Impact Development LID Water Sensitive Urban Design WSUD Sustainable Drainage System SuDS and Blue Green Infrastructure BGI especially with regard to the site conditions in the study area Through a literature research no specific impediments which would hinder an potential implementation could be detected However there are still general obstacles that discourage a more intensive utilization In the practical part the Urban Biophysical Environments Technologies Simulator UrbanBEATS a dedicated software for the planning of sustainable storm water management is used to detect suitable types and locations for the elements of sustainable storm water management in the study area In a further step the Storm Water Management Model SWMM of the United States Environmental Protection Agency USEPA is applied in order to assess the hydrological performance in quantitative terms The performance during five different storm events are recorded and show a peak runoff reduction up to 4 26% in the total system a peak flooding reduction up to 20 28% and a flooding volume reduction up to 17 49%      Low Impact Development and Sustainable Stormwater Management Thomas H. Cahill,2012-07-17 Sustainable Stormwater Management introduces engineers and designers to ideas and methods for managing stormwater in a more ecologically sustainable fashion It provides detailed information on the design process engineering details and calculations and construction concerns Concepts are illustrated with real world examples complete with photographs This guide integrates the perspectives of landscape architects planners and scientists for a multi disciplinary approach This is an enlightening reference for professionals working in stormwater management from engineers and designers to developers to regulators and a great text for college courses      **Low Impact Development Manual for Michigan** ,2008 This manual provides communities agencies builders developers and the public with guidance on how to apply LID to new existing and redevelopment sites The manual provides information on integrating LID from the community level down to the site level It not only outlines technical details of best management practices but also provides a larger scope of managing stormwater through policy decision including ordinances master plans and watershed plans      **LID** Wilmington (N.C.). City of,2014      Low Impact Development ,2010-07-01 The manual introduces general audiences to designing landscapes for urban stormwater runoff a primary source of watershed pollution The goal is to motivate awareness and implementation of LID in a wide cross section of stakeholders from property owners to municipal governments that regulate infrastructure development The manual provides a holistic framework in which a novice homeowner and an experienced developer can each find an equally transformative role to enact      Newhall Ranch Resource Management and Development Plan and Spineflower Conservation Plan ,2009      *City of Claremore Low Impact Development Manual* Kyle Clifton,2018 A professional project submitted to the

**Encouraging Low-impact-development Stormwater-management Practices** James Edward Brown, 2005 Regulatory codes and ordinances create a framework that guide stormwater management decision processes These regulations are designed to protect the health and safety of the public and to preserve the natural integrity of the environment Using a case study approach in Acton Massachusetts a two part examination is performed The first is a comprehensive review of Acton s developmental code and ordinances The second part of the study is a site redevelopment design using LID technologies for site level stormwater management To facilitate the regulatory review a code and ordinance worksheet COW developed by The Center for Watershed Protection CWP was used to evaluate Acton s regulations against the CWP s twenty two model development principles Acton s score was then compared to previously completed worksheets from eighteen other eastern seaboard communities The Discovery Museums a children s museum in Acton was chosen for the site redevelopment The museum expressed a desire to remove an existing parking area and reconfigure another lot to absorb the displaced spaces The EPA s Low Impact Development Design Strategies manual was used to guide the museum site planning and design development The design evaluation included comprehensive hydrologic and water quality analyses to determine pre and post development performance The results of the regulatory review demonstrate that Acton s existing developmental codes and ordinances do not presently encourage LID practices and have only a 62% agreement with the CWP model development principles The museum site redevelopment design proves that site level stormwater management technologies can be incorporated into the site landscape and be used to return the site s hydrologic volume rate and water quality to a pre developed condition
