

# Challenge Algebra 2 students with conditional probability

Hurricane season is kicking in, and the local emergency management team is preparing for potential evacuations. The emergency management team considers two main factors when deciding to evacuate the town due to an approaching hurricane: the hurricane's category and the distance of the town from the hurricane's predicted path.

Based on Florida hurricane records, the team has collected the following data:

	Category 1	Category 2	Category 3+
Close Proximity	8	5	4
Moderate proximity	10	18	13
Safe distance	31	17	23

Hurricanes tend to change their strength and paths as they get closer to making landfall. In each of the scenarios given, determine the probability that the town will be affected by the incoming hurricane.

a) The storm is a Category 4 hurricane.

b) The town is a safe distance from the hurricane.

c) Meteorologists know that an incoming hurricane will be Category 2 when it makes landfall. What is the probability that the town will be in moderate proximity given that it's a Category 2 storm?
