

# Types of logical reasoning

## analogical reasoning

using relational patterns by  
noticing similarities

saying "this thing is like that thing  
in this way"

noting the ways things correspond  
between the structures of one  
system and another system

## abductive reasoning

looking at the facts or situations before  
you and creating "most likely in the face  
of the facts" explanations

using reasoning such as Occam's razor  
(when choosing between possible  
explanations, choose the simplest one  
with the fewest assumptions)

## inductive reasoning

starting from individual observations and  
drawing generalizations

making and testing conjectures

moving from the specific to the general

## deductive reasoning

starting from accepted or agreed  
statements and using logical  
arguments to draw valid conclusions

constructing chains of reasoning using  
logical consequences
