How To Report Regression Analyses:

How to Report Statistics in Medicine Thomas Allen Lang,Michelle Secic,2006 This volume presents a comprehensive and comprehensible set of guidelines for reporting the statistical analyses and research designs and activities commonly used in biomedical research Government Reports Announcements & Index ,1988 **Summary and Analysis of Statistics of Charities Reporting to the State Board of Charities ...** New York (State). State Board of Charities, Frank Albert Fetter,1911 **Regression Analysis for the Social Sciences** Rachel A. Gordon,2010 The book provides graduate students in the social sciences with the basic skills that they need to estimate interpret present and publish basic regression models using contemporary standards Key features of the book include interweaving the teaching of statistical concepts with examples developed for the course from publicly available social science data or drawn from the literature thorough integration of teaching statistical theory with teaching data processing and analysis teaching of both SAS and Stata side by side and use of chapter exercises in which students practice programming *Biennial Report on Vital Statistics of the State of Minnesota for the Years ...* Minnesota. State Board of Health,1901 *Biennial Report of the Bureau of Labor Statistics for the State of Iowa* Iowa. Bureau of Labor Statistics,1914 **Census Reports Tenth Census: Report on cotton production in the United States ; and also embracing agricultural and physico-geographical descriptions of the several cotton states and of California** United States. Census Office,1884 *Analysis of Factors Influencing Errors in Self-reports about Child Support and Other Family-related Variables* Jennifer Dykema,2005 **International Crop Report and Agricultural Statistics** International Institute of Agriculture. Bureau of Statistics,1917 An Analysis of Fifty City Superintendents' Annual Reports Emil Rinsch,1927 **Swedish Behavioral Science Research Reports** ,1975 **Index Analysis of the Federal Statutes** United States,George Winfield Scott,Middleton Goldsmith Beaman,1908 *Annual Report of the State Board of Health and Vital Statistics of the Commonwealth of Pennsylvania* Pennsylvania. State Board of Health and Vital Statistics,1899 **Census Reports Tenth Census: Report on the mining industries of the United States (Exclusive of the precious metals), with special investigations into the iron resources of the republic and into the cretaceous coals of the northwest** United States. Census Office,1886 Testing Research Hypotheses with the General Linear Model Keith A. McNeil,Isadore Newman,Francis J. Kelly,1996 Because the technique of multiple linear regression has been accepted by the research community since 1975 Keith McNeil Isadore Newman and Francis J Kelly devote little space to defending the equivalence of correlational and ANOVA procedures with multiple linear regression Instead they show how the multiple linear regression technique frees the researcher from wondering if an analysis can be done and refocuses him or her back to the central concern the research question itself The first three sections of chapter 1 provide a conceptual research and statistical orientation to the entire text The remainder of chapter 1 furnishes the rationale for the utility of a conceptual model of behavior along with one such model that can be used to identify predictor variables

The authors strongly suggest that readers familiar with the general linear model read these three sections before delving into the more advanced material. Readers who are relatively unfamiliar with the general linear model should read the first eight chapters before branching off into topics that are of immediate interest. Examples are provided throughout the text, all using the same data in the same widely available statistical analysis package. Although the technique can be taught with matrix algebra, the authors use the simpler approach of vector algebra, an approach more in line with the way data are conceptualized and entered into the computer. All of the correlational statistical techniques are shown to be subsets of the general linear model. Of more importance, however, researchers are encouraged to think beyond these limitations and to ask the research questions they are interested in. Thus the common researcher is freed from the shackles of the right statistical procedure and its associated right computer analysis.
