

Ecology Vocabulary: Interactions Within the Environment

TEACHER KEY

Answer the questions below using the reading

1. Based on the definition of Ecology, what do you think the word parts "eco" and "ology" mean?

Eco means "environment" and ology means "the study of"

2. Compare and contrast abiotic and biotic factors using the diagram below.

3. Provide three examples of each:
 - a. Abiotic Factor: **soil, water, air, rocks, chemicals, sunlight, wind**
 - b. Biotic Factor: **fungi, plants, animals, bacteria, protists**
4. Write a paragraph explaining how energy flows through an ecosystem using the following terms: energy pyramid, trophic level, producer, consumer, decomposer
An energy pyramid shows how energy moves through an ecosystem. The sun is the source of all energy on Earth. The sun provides energy needed for the bottom of the energy pyramid: produces. Producers or autotrophs are plants that which harness much of the sun's energy to make their own food. As we move up the energy pyramid, much of the sun's energy is lost and only 10% of energy is transferred to each trophic level. The primary consumer is an herbivore or omnivore that eats the producers. Next tis the secondary consumer, a carnivore or omnivore that east the primary consumers. Tertiary or top consumers eat the secondary consumers.
