

INTERMEDIATE ACCOUNTING COVERAGE

Intermediate accounting is typically covered in two separate courses: Intermediate Accounting I and Intermediate Accounting II. This QuickStudy guide covers Intermediate II content. Intermediate I content (also covered in a QuickStudy guide) covers the following accounting concepts, some of which are prerequisites to the understanding of Intermediate Accounting II concepts:

- Conceptual framework
- Balance sheet
- Research and development
- Income statement
- Cash and equivalents
- Depreciation, depletion, and amortization

- Revenue recognition
- Receivables
- Intangible assets
- Comprehensive income
- Inventory
- Time value of money

- Statement of changes in equity
- Inventory valuation methods
- Financial disclosures
- Statement of retained earnings
- Property, plant, and equipment
- Auditor's report

INVESTMENTS

Classification of Investments: Debt securities (bonds and notes) and equity securities (common and preferred stocks).

- Debt securities:** Debt instrument that can be bought or sold between two parties and has basic terms defined, such as the amount borrowed (principal), interest rate, and maturity date.
- Equity securities:** An ownership interest in an entity or a right to acquire such an interest.
 - There are recorded at cost and measured at fair value when quoted market prices are available.
 - If quoted market prices do not exist, equity securities are reported at cost until sold.
- When the investing company lacks significant influence over the operating and financial policies of the investee, the investments are recorded using three categories:

Category	Criteria	Reporting Method Used	Treatment of Unrealized Gains and Losses
Held-to-maturity	Debt securities that the company has the intent to hold until maturity	Investment is reported at amortized cost with disclosure of fair value in the financial statement notes.	Not recognized
Trading	Debt or equity securities that the company intends to sell in the near future	Investment is reported at fair value.	Recognized in net income
Available-for-sale	Debt or equity securities not classified as held-to-maturity or trading	Investment is reported at fair value.	Recognized in other comprehensive income

Held-to-Maturity Securities

- These securities have a specified date that they mature and on that date the principal (face value) is paid to investors.
- Usually, interest is paid to the investor periodically during the life of the security.
- Prevalence:** If the interest rate (stated rate) paid by the debt security is higher than the prevailing market rate on similar risk debt securities, the debt instrument will be sold for a value greater than its face value.
 - EX:** A company buys a bond with a face value of \$1,000,000 for \$1,100,000. The premium is \$100,000. The bond would be recorded upon purchase as follows:

	Debit	Credit
Investment in bonds	\$1,000,000	
Premium on bonds	\$100,000	
Cash		\$1,100,000

- Discount:** If the interest rate (stated rate) paid by the debt security is lower than the prevailing market rate on similar risk debt securities, the debt instrument will be sold for a value less than its face value.
 - EX:** A company buys a bond with a face value of \$1,000,000 for \$750,000. The discount is \$250,000. The bond would be recorded upon purchase as follows:

	Debit	Credit
Investment in bonds	\$1,000,000	
Discount on bonds		\$250,000
Cash		\$750,000

Recognizing Interest Revenue on Held-to-Maturity Investments

- The effective interest method is used to calculate the interest revenue.
 - Effective interest rate:** The prevailing market rate of interest on debt securities with risk similar to the investment's risk.
 - EX:** A company buys a bond with a face value of \$1,000,000 for \$1,100,000. The stated rate of interest is 6%, but the market rate on debt securities with similar risk is 8%. The 8% rate will be used to calculate the interest income.

Trading Securities

Debt or equity securities that are acquired principally for the intent of selling them in the near future.

- These are typically reported as a current asset.
- Cash flows from buying and selling trading securities are typically classified as operating activities if traded by financial institutions.
 - If the company that is buying and selling trading securities is not a financial institution, then the cash flows from buying and selling the securities is classified as investing activity each time if the investment is not held for sale in the near term.
- It is recorded at cost but reported at fair value when the balance sheet is prepared.
 - Investment is written up or down to its fair value; this process is called "marking to market."
 - A valuation allowance account (fair value adjustment) is used to record the fair value adjustment, and an account called "net unrealized holding gains or losses" is used to record the rise or fall in fair value.
 - Fair value adjustment account is used to increase or decrease the carrying value of the trading securities asset value.
 - Net unrealized holding gains or losses are reported on the income statement.
 - Unrealized means that the gain or loss has not been realized because the investment has not yet been sold.
 - EX:** Investment A is a trading security that was acquired for \$100,000. Upon preparing a balance sheet, it is determined that investment A has lost \$20,000 of value. The entry would be as follows to record the unrealized loss and to re-value the investment account:

	Debit	Credit
Net unrealized holding gains and losses	\$10,000	
Fair value adjustment		\$10,000

- EX:** Investment B is a trading security that was acquired for \$100,000. Upon preparing a balance sheet, it is determined that investment B has gained \$20,000 of value. The entry would be as follows to record the unrealized gain and to re-value the investment account:

	Debit	Credit
Fair value adjustment	\$20,000	
Net unrealized holding gains and losses		\$20,000

Available-for-Sale Securities

Investments that are not intended to be traded actively but are available for sale if certain conditions are met or need arises.

- These are neither held-to-maturity nor trading securities.
- Cash flow from buying and selling available-for-sale securities are classified as investing activities on the statement of cash flows.
- Like trading securities, they are recorded at cost when acquired and reported at fair value on the balance sheet.
- Unlike trading securities, unrealized gains or losses on available-for-sale securities are not included in net income, but rather are reported on the statement of comprehensive income as other comprehensive income.
 - Comprehensive income includes not only net income, but other changes in equity that do not arise from transactions with owners.
 - EX:** Investment A is an available-for-sale security that was acquired for \$100,000. Upon preparing a balance sheet, it is determined that investment A has lost \$20,000 of value. The entry would be as follows to record the unrealized loss and to re-value the investment account:

	Debit	Credit
Net unrealized holding gains and losses OCI	\$10,000	
Fair value adjustment		\$10,000

Intermediate Accounting 2 Study Guide

Donald E. Kieso, Jerry J. Weygandt

Intermediate Accounting 2 Study Guide:

This is likewise one of the factors by obtaining the soft documents of this **Intermediate Accounting 2 Study Guide** by online.
