**A Short and Happy Guide to the Bar Exam's Multistate Essay Examination (MEE)** Suzanne D.

Darrow-Kleinhaus, Irene McDermott Crisci, 2019-02-27 A Short Happy Guide to the MEE is shorter than other books on the bar exam because its sole focus is the Multistate Essay Examination. It is a one source resource for what you need to maximize your performance on the MEE not a generic essay writing guide but a treasury of information issue identification and subject area frameworks tailored specifically for the MEE. This book is not intended to replace a bar review course for the substantive law you need to know to pass the bar exam. However a bar review course does not show you how to turn the law into point worthy essays. We do. We teach you everything that you need to know about preparing for and taking the MEE to achieve the highest possible essay scores beginning with how to use the individual Subject Charts organized by MEE subject and Table of Issues organized by bar administration. These charts identify every issue and sub issue tested on the MEE over the past 14 years thus letting you see the frequency of tested topics and gain familiarity with how they are tested. When combined with our unique strategies for writing under timed conditions developing a well organized answer and writing a solid analysis you are ready to write your way to bar passage. **Assessing Competence in Professional Performance across Disciplines and Professions** Paul F. Wimmers, Marcia Mentkowski, 2016-04-19 This book examines the challenges of cross professional comparisons and proposes new forms of performance assessment to be used in professions education. It addresses how complex issues are learned and assessed across and within different disciplines and professions in order to move the process of performance assessment for learning to the next level. In order to be better equipped to cope with increasing complexity change and diversity in professional education and performance assessment administrators and educators will engage in crucial systems thinking. The main question discussed by the book is how the required competence in the performance of students can be assessed during their professional education at both undergraduate and graduate levels. To answer this question the book identifies unresolved issues and clarifies conceptual elements for performance assessment. It reviews the development of constructs that cross disciplines and professions such as critical thinking clinical reasoning and problem solving. It discusses what it means to instruct and assess students within their own domain of study and across various roles in multiple contexts but also what it means to instruct and assess students across domains of study in order to judge integration and transfer of learning outcomes. Finally the book examines what it takes for administrators and educators to develop competence in assessment such as reliably judging student work in relation to criteria from multiple sources. The co editors of this volume Marcia Mentkowski and Paul F Wimmers are associated with two institutions whose characters are so intimately associated with the insight that assessment must be integrated with curriculum and instructional program if it is to become a powerful influence on the educational process.
