Earthwater: Water the greatest source of water on Earth. There are many different types of water. It is found in the ground, in the air, and in the clouds. It is also found in the oceans, lakes, and rivers.

Water is all around us, and it is necessary for life. It is found in the air, in the ground, and in the oceans. It is also found in the clouds, lakes, and rivers. It is the most important part of our planet.

When the sun heats up the water, it turns into a gas called water vapor. This process is called evaporation. The water vapor then rises up into the atmosphere, where it is cooled and turns back into liquid water. This process is called condensation.

As the water vapor rises higher in the atmosphere, it gets colder. The cold air causes the water vapor to turn back into the water droplets in the clouds. This process is called precipitation.
