**The BERA-Sage Handbook of Research-Informed Education Practice and Policy** Dominic Wyse, Vivienne Baumfield, Nicole Mockler, Martin Reardon, 2025-06-19 One of the most pressing topics worldwide is how we can improve education to enhance people's life chances. The BERA Sage Handbook of Research Informed Education Practice and Policy 2 Vol offers an in-depth exploration of the ways in which education research intersects with and can lead to improvements in education. Through detailed examinations of educational policies, practices, values, and research methodologies, the handbook navigates the complexities inherent in educational systems and, in so doing, presents a unique new picture of education worldwide. Volume One of the Handbook set focuses on Understanding Research Informed Education and Volume Two focuses on how to implement it. Across six parts and fifty-two chapters, the authors and editors explore a myriad of critical topics, including using research to promote equity within education systems, rethinking pedagogy and knowledge mobilisation through practitioner-led inquiry. New developments in aspects such as systematic approaches to research synthesis are presented by world-leading experts. Authors of the chapters draw from many different sources to provide a comprehensive understanding of education, including perspectives from the arts, humanities, natural sciences, and social sciences. This understanding combines cutting-edge education research and scholarship to provide insights into how education is enacted in countries and institutions through policy and practice. Featuring a truly diverse team of scholars to account for global perspectives, the BERA Sage Handbook of Research Informed Education Practice and Policy 2 Vol is an invaluable resource for scholars, researchers, students, and practitioners who are interested in the new frontiers in education research, policy, and practice.

Volume One: Understanding Research Informed Education  
Part One: Defining and Theorising Research Informed Education  
Part Two: Methodological Debates in the Field  
Part Three: International Comparison and Educational Policy  
Volume Two: Implementing Research Informed Education  
Part Four: Effective policy and practice in national contexts  
Part Five: Curriculum, pedagogy, and assessment  
Part Six: Practitioners and learners as researchers

*What's Our Problem?* Tim Urban, 2023-02-21 From the creator of the wildly popular blog Wait But Why, a fun and fascinating deep dive into what the hell is going on in our strange, unprecedented modern times. Between 2013 and 2016, Tim Urban became one of the world's most popular bloggers, writing dozens of viral long-form articles about everything from AI to colonizing Mars to procrastination. Then he turned his attention to a new topic: the society around him. Why was everything such a mess? Why was everyone acting like such a baby? When did things get so tribal? Why do humans do this stuff? This massive topic sent Tim tumbling down his deepest rabbit hole, yet through mountains of history, evolutionary psychology, political theory, neuroscience, and modern-day political movements, as he tried to figure out the answer to a simple question: What's our problem? Six years later, he emerged from the hole holding this book. *What's Our Problem?* is a deep and expansive analysis of our modern times in the classic style of Wait But Why, packed with original concepts, sticky metaphors, and 300 drawings. The

book provides an entirely new framework and language for thinking and talking about today's complex world. Instead of focusing on the usual left-center-right horizontal political axis which is all about what we think, the book introduces a vertical axis that explores how we think as individuals and as groups. Readers will find themselves on a delightful and fascinating journey that will ultimately change the way they see the world around them. Anyway, he wanted to say a lot more about all of this but there was a word limit on this book description so just go read the book.

**World Heritage and Human Rights**  
Peter Bille Larsen, 2017-11-20  
The World Heritage community is currently adopting policies to mainstream human rights as part of a wider sustainability agenda. This interdisciplinary book combines a state-of-the-art review of World Heritage policy and practice at the global level with ethnographic case studies from the Asia-Pacific region by leading scholars in the field. By joining legal reviews, anthropology, and practitioner experience through in-depth case studies, it shows the diversity of human rights issues in both natural and cultural heritage sites. From site designation to their conservation and management, the book explores the various rights issues and analyses the diverse social, cultural, and legal challenges and responses at both regional and global levels. Detailed case studies are included from Australia, Cambodia, China, Malaysia, Myanmar, Nepal, the Philippines, and Vietnam. The book will appeal to both natural and cultural heritage professionals and human rights and heritage scholars and will serve as a useful compendium for courses, allowing students to compare, contrast, and contextualize different contexts.

**Financial Inclusion Regulatory Practices in SADC**  
Howard Chitimira, Tapiwa Warikandwa, 2023-05-25  
Against a background of calls to prioritise the improvement of financial inclusion in Africa, this book provides an analysis of current financial inclusion measures in Southern Africa. Evaluating the existing strengths and weaknesses of financial inclusion in Africa, it identifies opportunities to improve inclusive financial services and aid poverty reduction in the region. With a focus on South Africa, Namibia, Botswana, and Zimbabwe as case studies for assessing current financial inclusion in the context of particular challenges faced by unbanked and underbanked customers who are easy targets for cybercriminals due to low levels of digital literacy, it looks into the regulation and promotion of financial inclusion in Southern Africa. The book explores financial inclusion in the context of digital transformation in the 21st century, examining the regulation and promotion of financial inclusion in the context of digital transformation as well as the challenges related to financial inclusion. Suggesting improvements to aspects of company law, securities, and financial markets in the Southern African Development Community region, the book offers a comprehensive study on the regulation and promotion of financial inclusion in the Southern African Development Community region. It will be essential reading for students and academics researching financial inclusion, international economic law, and development.

*Educating Tomorrow's Engineers*  
Great Britain: Parliament: House of Commons: Science and Technology Committee, 2013-02-08  
In the UK, we teach young people to become computer users and consumers rather than programmers and software engineers. This is creating a chronic skills gap in ICT. We need around 82,000 engineers and technicians just to deal with retirements up to 2016 and 830,000 SET.

professionals by 2020 On the plus side the Government's proposal to include computer science as a fourth science option to count towards the EBac is welcomed The Committee also welcomes the EBac's focus on attainment of mathematics and science GCSEs but is concerned that subjects such as Design and Technology D T might be marginalised A Technical Baccalaureate TechBac is being designed but if it is to be a success schools should be incentivised to focus on the TechBac by making it equivalent to the EBac Reforms to vocational education following the Wolf Review meant that Level 2 of the Engineering Diploma a qualification highly regarded would count as equivalent to one GCSE despite requiring curriculum time and effort equivalent to several GCSEs The Engineering Diploma however is currently being redesigned as four separate qualifications The Committee also expressed concerns over the Department for Education's DfE lack of clarity on its research budget and use of evidence in decision making The DfE needs to place greater focus on gathering evidence before changes to qualifications are made and must leave sufficient time for evidence to be gathered on the effectiveness of policies before introducing further change The possibility of gathering evidence from randomised controlled trials RCTs should be seriously considered

God and Gaia Michael S Northcott, 2022-12-22 God and Gaia explores the overlap between traditional religious cosmologies and the scientific Gaia theory of James Lovelock It argues that a Gaian approach to the ecological crisis involves rebalancing human and more than human influences on Earth by reviving the ecological agency of local and indigenous human communities and of nonhuman beings Present day human ecological influences on Earth have been growing at pace since the Scientific and Industrial Revolutions when modern humans adopted a machine cosmology in which humans are the sole intelligent agency The resultant imbalance between human and Earthly agencies is degrading the species diversity of ecosystems causing local climate changes and threatens to destabilise the Earth as a System Across eight chapters this ambitious text engages with traditional cosmologies from the Indian Vedas and classical Greece to Medieval Christianity with case material from Southeast Asia Southern Africa and Great Britain It discusses concepts such as deep time and ancestral time the ethics of genetic engineering of foods and viruses and holistic ecological management Northcott argues that an ontological turn that honours the differential agency of indigenous humans and other kind and that draws on sacred traditions will make it possible to repair the destabilising impacts of contemporary human activities on the Earth System and its constituent ecosystems This book will be of considerable interest to students and scholars of the environmental humanities history and cultural and religious studies
