Breaking the Ice Matt Noffs,2016-07-01 The so called war on drugs has been a colossal failure and this book offers further proof that we must treat drug use as a public health issue not as a crime Sir Richard Branson This landmark book from Matt Noffs and his team at the Noffs Foundation is a much needed voice of reason in the national conversation around the drug ice What is ice What does it do to the brain What can we learn from previous drug policies about managing the current crisis And what are the practical steps we can take as parents and carers to help our kids Matt Noffs has interviewed leading experts in the public health sector and the justice system along with drug policymakers and shapers as well as ice users and their families He believes we can keep the crisis contained and managed but we need to do so calmly and strategically as parents as a community and as a nation For anyone seeking to understand what the drug is and how to help our children and our communities get through this crisis this book is full of facts and sensible advice and most importantly it is full of hope

How the Social Context Influences Mentoring Beginning Teachers at Grammar Schools in Lucerne Bruno Rihs,2008-02 Seminar paper from the year 2007 in the subject Pedagogy Job Education Occupational Training Further Education University of Sheffield Faculty of Organisation and Management 24 entries in the bibliography language English abstract The aim of this assignment is to look at how the social context influences mentoring beginning teachers We discuss different conditions that affect the performance of the mentoring process and look at the context and the people and analyse interaction between them The model We use follows the basic principles of the Theme Centred Interaction TCI of Ruth Cohn Instead of the term Globe that is used in TCI we will look at the context in which mentoring takes place Then we will look at the people involved the actors and their roles and finally we will reflect on the interaction It can be suggested from this discussion that social context does

attribute in a significant manner on the relationship between a mentor and his/her mentee. It would be only logical to be aware of this influence of social or outside environment and make it conducive for both the mentor and the mentee so as to nurture this relationship into a strong bond. Trust is something that happens within people only when it is created between people. Chip R Bell. In the process of mentoring relationship between the two individuals involved have to build on this trust themselves for a better outcome therefore one has to believe in the process and its consequences. As Vivian Buchen said, One change makes way for the next giving us the opportunity to grow. Social growth of those involved depends on the process and in turn they help in growth of the society. Coming together is a beginning. Keeping together is progress. Working together is a success. *Language Matters* Christopher N. Candlin, Sik Hung Ng, Chi-yue Chiu, 2004. This book stresses on the social purpose of language use and its cognitive development. It covers a diverse set of topics with many real life illustrations of the interaction of culture identity and communication. **Journal of the American Dietetic Association**, 2003. *Mentoring for the Spanish Speaking Nurse* Dr. Tracey Soper, 2017-11-24. Research Paper postgraduate from the year 2017 in the subject Communications Intercultural Communication grade 4 0 course Practicum language English abstract. The purpose of this quantitative project was to examine if the implementation of a mentoring program for Spanish speaking nurses facilitated improvement in communication. This project focused on answering did the improved communication resulting from the mentoring program lead to improved patient interactions and ultimately improved patient satisfaction as evidenced by their Hospital Consumer Assessment of Healthcare Providers and Systems survey results. The project studied 78 nurses randomly selected from the nurses on a Southwest telemetry unit. Nurses were then assigned the role of mentor or mentee. To qualify as a mentor the nurse had to speak fluent English, have an above average employment evaluation. The director of the unit approved the mentor/mentee assignments. The communication section of the HCAHPS survey was compared from the time frame in 2016 to the exact same time frame in the year previously. A statistical analysis of the data revealed there was no difference in communication by nurses based on the mentor/mentee program outcomes as demonstrated on the HCAHPS survey results. It can be concluded that the mentor program may not be cost and time effective. The study recommends that hospital educators formulate policies that support effective communication of nurses while also considering the efficient use of nurses' time and institutional financial resources. El Paso, Texas is fewer than five miles from the United States/Mexico border and 81.2% of its residents identify as Hispanic. Many of these residents speak Spanish as their first language; the same is true for nurses working in the city and its surrounding areas. Approximately 80% of the nurses in a given unit at the Southeastern Hospital speak Spanish and 90% of the patients are English speaking. Patient satisfaction measured by the HCAHPS is low and for this hospital it appears to result from the number of Spanish speaking nurses that serve patients in these units. Evidence suggests that difficulty communicating with patients is common for Spanish speaking nurses and those that speak other non-English languages. The result is a high turnover rate among nurses as well as poor patient outcomes and

satisfaction these results are consistent with what has been observed at Southeastern Hospital *The Mentoring and Professional Development of New Music Educators* Michael Vernon Smith,1994 *The Journal of Nursing Education* ,1988
