You'll need a maple board, a mini-b USB cable, a functional computer, and possibly root (or "administrator") access to that computer. If you have trouble along the way try the [install page](#) for more detailed download and installation instructions, and the [troubleshooting](#) page for help with some common problems: if all else fails try [google](#), our [forum](#), or [contact us directly!](#)

## 1. Download the IDE

The latest binary release of the Maple IDE for can be downloaded using the links below. The package bundles together a compiler, an upload utility, a software library, and a simple GUI text editor. All this software is [free and open](#), we are grateful to the [Arduino](#), [Codesourcery](#), [GNU](#), and [OpenMoko](#) developers, as well as many others, who allow us to reuse their software.

Linux	Tested on Ubuntu 9.10 (64bit) and 10.04 (32bit)	<a href="#">maple-ide-LATEST-linux32.tgz</a> (about 30mb) <a href="#">maple-ide-LATEST-linux64.tgz</a> (about 30mb)
Mac OSX	Coming soon!	
Windows	Tested on 32bit Windows XP	<a href="#">maple-ide-LATEST-windowsxp32.zip</a> (about 70mb)

The IDE is written in Java and requires a compatible runtime (JRE). Our windows release includes runtime, Mac OSX has one installed already, and it's pretty easy to install one on Linux. If you don't have a JRE and dont know how to get one setup see the [installation page](#).

## 2. Unzip it to a appropriate home

Once it's downloaded, you need to chose a place to unzip the IDE. Unless you've got a special place of honor in mind just plop it on your desktop or in your home folder. Make sure you actually extract the contents out of the archive instead of running it live out of the archive file.

On *Linux only*, you'll want to run the `install-udev-rules.sh` at this point, it will ask for root permissions. This will grant members of 'plugdev' read/write access to Maple devices over USB.

On *Windows only*, you'll have to install drivers, see the [installation page](#). Sorry!

On *Mac OS X only*, you can just drag and drop the Maple IDE folder to install it in your applications folder. You'll also want to install the serial port driver bundled in the archive, and ignore the ACM modem setup dialog that pops up when you plug in the Maple.
