by *Avant*  
GARDEN DECOR

Growing your own vegetables saves you money while creating a homegrown supply of fresh foods.

## Why plant a fall garden?

Spring crops vacate space that can allow for summer sowing and fall harvesting. **MAXIMIZE** your garden's production by planting in the summer and eat fresh in the fall.

## PLANTS FOR A FALL GARDEN:

## GETTING STARTED...

### STEP 1

Remove dead spring plantings and add to your compost pile.

### STEP 2

Refresh your soil using a compost mixture.

### STEP 3

Plant your fall vegetables according to package instructions – be cognizant of light and water requirements.

### STEP 4

In spaces that aren't being used to produce crops consider planting red clover or annual rye grass to turn over in the spring and add nutrients to the soil.

## Using Raised Garden Beds

Gardeners have their own preference for why they employ raised beds for gardening. The most popular reasons include:

- Economically efficient – Raised beds save money on water and fertilizer as you only apply to the raised bed where the crops are growing, not all the space between as done in a normal garden layout
- Less weeding – Weeds can't flourish in densely grown areas because they are unable to compete with the root systems in a raised bed
- Longer growing season – Raised beds offer a warmer environment for soil and therefore can lengthen the growing season. Additionally, the soil also dries out faster so cool-season crops can be planted earlier, too.
- More comfortable – The height offered by raised beds can make gardening a more comfortable and enjoyable hobby. Backs, shoulders, and knees will be thankful for not continuously hunching over.

- Protect against critters – Creating your raised beds at hip height can act as a defense against moles, rabbits, groundhogs, and more
