Malawi 2015 English Paper Sheet:

The End of Development Andrew Brooks, 2017-05-15 Why did some countries grow rich while others remained poor Human history unfolded differently across the globe The world is separated into places of poverty and prosperity Tracing the long arc of human history from hunter gatherer societies to the early twenty first century in an argument grounded in a deep understanding of geography Andrew Brooks rejects popular explanations for the divergence of nations This accessible and illuminating volume shows how the wealth of the West and poverty of the rest stem not from environmental factors or some unique European cultural social or technological qualities but from the expansion of colonialism and the rise of America Brooks puts the case that international inequality was moulded by capitalist development over the last 500 years After the Second World War international aid projects failed to close the gap between developed and developing nations and millions remain impoverished Rather than address the root causes of inequality overseas development assistance exacerbate the problems of an uneven world by imposing crippling debts and destructive neoliberal policies on poor countries But this flawed form of development is now coming to an end as the emerging economies of Asia and Africa begin to assert themselves on the world stage The End of Development provides a compelling account of how human history unfolded differently in varied regions of the world Brooks argues that we must now seize the opportunity afforded by today's changing economic geography to transform attitudes towards inequality and to develop radical new approaches to addressing global poverty as the alternative is to accept that impoverishment is somehow part of the natural order of things **Global**

Corruption Report: Education Transparency International, 2013-10-08 Corruption and poor governance are acknowledged as major impediments to realizing the right to education and to reaching the Millennium Development Goal of universal primary education by 2015 Corruption not only distorts access to education but affects the quality of education and the reliability of research findings From corruption in the procurement of school resources and nepotism in the hiring of teachers to the buying and selling of academic titles and the skewing of research results major corruption risks can be identified at every level of the education and research systems Conversely education serves as a means to strengthen personal integrity and is a critical tool to address corruption effectively The Global Corruption Report GCR is Transparency International's flagship publication bringing the expertise of the anti corruption movement to bear on a specific corruption issue or sector The Global Corruption Report on education consists of more than 70 articles commissioned from experts in the fields of corruption and education from universities think tanks business civil society and international organisations The Global Corruption Report on education and academic research will provide essential analysis for understanding the corruption risks in the sector and highlight the significant work that has already been done in the field to improve governance and educational outcomes This will be an opportunity to pull together cutting edge knowledge on lessons learnt innovative tools and solutions that exist in order to fight corruption in the education sector **Kangaroo mother care: a transformative**
