## **Instance Specific Algorithm Configuration:**

Instance-Specific Algorithm Configuration Yuri Malitsky, 2014-11-20 This book presents a modular and expandable technique in the rapidly emerging research area of automatic configuration and selection of the best algorithm for the instance at hand The author presents the basic model behind ISAC and then details a number of modifications and practical applications In particular he addresses automated feature generation offline algorithm configuration for portfolio generation algorithm selection adaptive solvers online tuning and parallelization The author's related thesis was honorably mentioned runner up for the ACP Dissertation Award in 2014 and this book includes some expanded sections and notes on recent developments Additionally the techniques described in this book have been successfully applied to a number of solvers competing in the SAT and MaxSAT International Competitions winning a total of 18 gold medals between 2011 and 2014 The book will be of interest to researchers and practitioners in artificial intelligence in particular in the area of machine learning and constraint programming
