Korotaev, 2011-10-06 In the book the idea of irreversibility as an inherent property of time is developed theoretically and experimentally The matter is related with causality and the method of causal analysis is presented The quantum causal analysis helps understand the principle of weak causality which admits extraction of information from the future without the classical paradoxes It implies a possibility of observation of the future as the existing reality So the acceptance of time irreversibility leads to a striking manifestation of reversibility signaling in reverse time Quantum insight allows considering correlations of the distant irreversible processes as nonlocal ones originated from a macroscopic entanglement The experimental approach to study of macroscopic nonlocality is discussed and design of the experimental setup is described The results of experiments on macroscopic nonlocal correlations the signals in reverse time and their application to the forecast of large scale random processes are expounded **The Science Teacher**, 1982 Some issues are accompanied by a CD ROM on a selected topic **Evolution** Joseph LeConte, 1894 **General Science Quarterly**, 1926
