Introduction

There are four market types namely; monopoly, monopolistic competition, pure competition and oligopolistic markets (Peterson 1977). Pure monopolies and pure competition firms represent the two extremes of competition which is not easy to find in practice. The following is a review of an example of an organisation in Maryland operating in a pure competition market and one in a pure monopoly market.

Example of a firm operating in a pure competition market

Pure competitors such as retail operations however have no control of the market and thus no control over prices (O'Sullivan, Sheffrin, and Perez 2009). A firm in such a market could sell any quantities of its products without influencing the market prices.

It is quite difficult to get markets that are purely competitive where buyers have full knowledge, there are no barriers of entry and exit, buyers can easily switch from one seller to the other, and where there are a large number of buyers and sellers. However, retailers of agricultural commodities could provide a good example of a pure competition market.

Some traders have sought to differentiate their farm produce thus reducing price competition in this market. For instance, since consumers are becoming more health conscious, traders of farm produce are venturing into natural foods in place of GMOs whereas packaging is also gaining prominence as a differentiation tool.

Market for agricultural products is set to change resulting to a decline in price competition. Traders are seeking other forms of competitive fronts such as packaging and focus of healthy products. Therefore, the market is set to convert into monopolistic competition where differentiation is critical. Suppliers should therefore brace themselves for non-price competition.

Example of a pure monopoly

The following is an example of a pure monopoly in the United States. The company is a large, vertically integrated firm that produces and distributes a single product. The company has a high barrier to entry and a high degree of market power.

The company's market power is derived from its control over the supply of a single product. The company has a high degree of market power and a high barrier to entry. The company's market power is derived from its control over the supply of a single product.
