

History Research Papers

WRITING SERVICES - UNCW - DEPAOLO HALL, 1ST FLOOR - 962-7857

To write a good research paper, you must ask a good historical question.

History is the study of **change over time**. When somebody writes a history paper or book, she is **offering an interpretation** of how and why something changed over time.

So a historical question is one that asks **how to interpret change over time**.

Not every question about the past is a historical question. Historical questions address **change and how to interpret that change**. They must have boundaries of **time, place, and people**.

Bad: How did African-Americans react to World War Two?

Better: How did Southern African-Americans react to the draft in World War Two?

Best: How and why did lower class African-Americans from North and South Carolina respond to the draft from 1941-1945?

This last question focuses research on a **specific group** of people in a **specific place** during a **specific time**. Because there is a response over a period of time, it allows several answers, including how their response could have changed over the time period.

A good question is also one that is **significant**. You should be able to say why it is important to answer this question.

Your interpretation must be supported by the **primary sources**. You need **evidence** to support your interpretation. Different interpretations are possible, so why should the reader believe yours over someone else's?

To come up with a question, pick a narrow topic.

The easiest way to pick a topic – picking something general or really famous (e.g.: Civil War, Nazis, WWII) – will leave you with too broad of a topic. You need direction and focus; otherwise, you will have too much information or will get bored with what you already know. It is not that there is nothing new to learn about those kinds of topics, but if you cannot say exactly what new thing you want to learn about it, you are probably not as interested in it as you think you are. You must have an interest in an aspect of the topic or a desire to explore it from a different angle (e.g. the draft in WWII).

Try picking something that really interests you. Pick something you have questions about. Pick something you are willing to read a lot about.

Do not pick something that you have already made up your mind about, unless you are willing to change your mind based on the evidence.

Fostering Family History Services Rhonda L. Clark, Nicole Wedemeyer Miller, 2016-02-22 Here is everything you need to promote your library as a center for genealogical study by leveraging your collection to help patrons conduct research on ancestors, document family stories, and archive family heirlooms. Websites, social media, and the Internet have made research on family history accessible. Your library can tap into the popularity of the do-it-yourself genealogy movement by promoting your role as both a preserver of local community history as well as a source for helping your patrons archive what's important to their family. This professional guide will teach you how to integrate family history programming into your educational outreach tools and services to the community. The book is divided into three sections: the first introduces methods for creating a program to help your clients trace their roots; the second provides library science instruction in reference and planning for local collections; and the third part focuses on the use of specific types of resources in local collections. Additional information features methods for preserving photographs, letters, diaries, documents, memorabilia, and ephemera. The text also includes bibliographies, appendices, checklists, and links to online aids to further assist with valuing and organizing important family mementos.

Communities of Kinship Carolyn Earle Billingsley, 2004 Billingsley reminds us that contrary to the accepted notion of rugged individuals heeding the proverbial call of the open spaces, kindred groups accounted for most of the migration to the South's interior and boundary lands. In addition, she discusses how, for antebellum southerners, the religious affiliation of one's parents was the most powerful predictor of one's own spiritual leanings, with marriage being the strongest motivation to change them. Billingsley also looks at the connections between kinship and economic and political power, offering examples of how Keese family members facilitated and consolidated their influence and wealth through kin ties.

The Social Work of Museums Lois H. Silverman, 2009-12-04 Museums may not seem at first glance to be engaged in social work. Yet Lois H. Silverman brings together here relevant visitor studies, trends in international practice, and compelling examples that demonstrate how museums everywhere are using their unique resources to benefit human relationships and ultimately to repair the world. In this groundbreaking book, Silverman forges a framework of key social work perspectives to show how museums are evolving a needs-based approach to provide what promises to be universal social service. In partnership with social workers, social agencies, and clients, museums are helping people cope and even thrive in circumstances ranging from personal challenges to social injustices. *The Social Work of Museums* provides the first integrative survey of this emerging interdisciplinary practice and an essential foundation on which to build for the future. *The Social Work of Museums* is not only a vital and visionary resource for museum training.

and practice in the 21st century but also an invaluable tool for social workers creative arts therapists and students seeking to broaden their horizons It will inspire and empower policymakers directors clinicians and evaluators alike to work together toward museums for the next age
