This book is an invaluable resource for teachers across all content areas, masters and doctoral research method classes, and future Teachers of the Year.

Writing Reports to Get Results Ron Blicq, IEEE Professional Communication Society, 1987. The professional's quick reference handbook for writing business and technical reports. Professionals in business, government, and technical fields often need help in organizing and writing reports for associates, clients, and managers. This simple tutorial handbook offers expert tips and useful ideas for organizing ideas, structuring reports, and adding spice to technical papers. *Writing Reports to Get Results* offers in-depth guidance for writing short, informal reports such as job progress reports and inspection reports; semiformal reports such as laboratory and medium-length investigation and evaluation reports; formal reports such as analytical and feasibility studies and major investigations; technical and business proposals of varying complexity. The authors use a simple pyramid method to help writers organize their information into the most convenient and simplest structure for any type of document, from single-page proposals to full-length presentations. Rounding out this easy instructional handbook are helpful tips on a number of other topics, such as constructing reference lists and bibliographies, the use of numbers, abbreviations, and metric symbols, preparing illustrations for insertion into a report, and working collaboratively as a member of a writing team.

Experiments in Logic and Computer Design Albert Y. Teng, William A. Malmgren, 1984. Laboratory Investigations in Cell and Molecular Biology Allyn Bregman, 1996-02-02. This revised workbook/lab text consists of 21 projects that can be executed with readily available materials, a minimum of elaborate equipment, and a reasonable amount of preparation time. Early projects deal with biochemistry and cytochemistry; the middle ones focus on organelles and their physiology; and later activities explore more advanced molecular topics such as restriction mapping strategies. New to this edition: a concise section on statistics covering the mean, standard deviation, and standard error; and a chapter designed to enable students to write up their work as a lab report.
