straight 4 or V8 of your choice including Ford Pinto Ford Zetec Rover K Series and even motorcycle units *Powertrain*
Michael Trzesniowski,2023-03-02 In this book the reader learns the essential differences to the passenger car through the
analysis divided according to assemblies This gives him the tools to apply the detailed knowledge acquired to the design and
development of competition vehicles In the case of internal combustion engines the focus is on performance enhancing
measures for racing vehicles From the choice of the number of cylinders to the intake system to the exhaust system the lever
can be applied to every assembly For electric drives the traction battery cell selection cooling and operating strategy are
considered in more detail Energy recovery systems are an interesting enhancement for hybrid vehicles and all electric
powertrains especially in strategic considerations for racing Finally gearboxes are needed independently of the drive source
albeit matched to it so that the full potential can be exploited The detailed in depth presentation makes this work just as
suitable for the interested motorsport enthusiast as it is for the engineer in the field who is addressing the issues
surrounding race car powertrains The formula material is prepared in such a way that the book can also be used as a
