

Safety Recall: Driver's Airbag Inflator Can Be Over-Pressurized

(Supersedes 08-093, dated January 16, 2009, to revise the information marked by the black bars)

REVISION SUMMARY

Under **VEHICLES AFFECTED**, the VIN ranges were expanded, and the total affected vehicles were increased to about 7,000.

BACKGROUND

A manufacturing error can produce over-pressurization of the driver's (front) airbag inflator during airbag deployment. If an affected airbag deploys, the increased internal pressure may cause the inflator casing to rupture. Metal fragments could pass through the airbag cushion material, possibly causing an injury or fatality to vehicle occupants.

Within all the affected VIN ranges, there are only about 7,000 affected vehicles. To verify vehicle eligibility, you must check at least one of these items:

- The customer has a notification letter.
- The vehicle is shown as eligible on a VIN status inquiry.

In addition, check for a punch mark below the third character of the engine compartment VIN. A punch mark in that location means this campaign has already been completed.

Some vehicles affected by this campaign may be in your used vehicle inventory. As a matter of federal law, these vehicles must be repaired before they are sold.

Should a dealership sell an unrepaired vehicle that subsequently causes an injury or damage because of the recalled item, the dealership will be solely responsible to the damaged party, and will be required to defend and indemnify American Honda for any resulting claims. To see if a vehicle is affected by this campaign, do a VIN status inquiry before setting it.

CUSTOMER NOTIFICATION

Owners of affected vehicles have or will receive a notification of this campaign. An example of the customer notification is at the end of this service bulletin.

CORRECTIVE ACTION

Install a driver's airbag inflator kit, then return the original, undeployed inflator to its supplier, ideally within 48 hours of the repair.
